William Faulkner once said, "The
past is never dead. It's not even
past." Nowhere can you see the
truth behind his comment more
plainly than in rural New England,

especially Maine, New Hampshire, Vermont, and western Massachusetts. Everywhere we go in rural New England, the past surrounds us. In the woods and fields and along country roads, the traces are everywhere if we know what to look for and how to interpret what we see. A patch of neglected daylilies marks a long-abandoned homestead. A grown-over cellar hole with nearby stumps and remnants of stone wall and orchard shows us where a farm has been reclaimed by forest. And a piece of a stone dam and wooden sluice mark the site of a long-gone mill. Although slumping back into the landscape, these features speak to us if we can hear them and they can guide us to ancestral

homesteads and famous sites. Lavishly illustrated with drawings and color photos. Provides the keys to interpret human artifacts in fields, woods, and roadsides and to reconstruct the past from surviving clues. Perfect to carry in a backpack or glove box. A unique and valuable resource for road trips, genealogical research, naturalists, and historians.

Rowman & Littlefield
Written for the cyclists of
all stripes, *Best Bikes
Rides Near Chicago*
marks the debut of a new
series that offers a diverse
array of scenic tours in
some of America's
largest urban
destinations—from easy
excursions for the Sunday
cyclist to challenging treks
for the veteran. Here,
veteran author and cyclist
Ted Villaire presents 35
diverse rides in and
around the Windy City. As

amply demonstrated by
this guide, Chicago's
heritage as a
transportation hub has
reaped huge rewards for
local cyclists. Twenty
miles of lakeshore
parkland and an elaborate
system of leafy boulevards
connect a series of mega-
parks throughout the city.
Coupled with this is an
ever-expanding cycling
infrastructure featuring
more than 100 miles of
bikes lanes. The Illinois
Prairie Path, which runs
between the Des Plaines

River and Wheaton, was one of the first linear trails in the nation converted from a railroad line—and today it is part of the most extensive collection of rail trails in the Midwest, perhaps the nation.

Chameleons Arcadia Publishing

The village of Matteson was founded in 1855 and named after the 10th governor of Illinois, Joel Matteson. German immigrants were the area's first settlers, seeking agriculture and business opportunities. The Illinois Central and Michigan

Central Railroads provided the stimulus for the growth of one of the first communities to the south of Chicago. The area became popular in the 1890s, when Chicago residents rode special trains to visit the amusement park run by Moses and Freeman Elliott. By the mid-20th century, the town had established itself as a growing bedroom community due to the electrification of the Illinois Central suburban service in 1926 and an increase in residential housing designed for American GIs returning

home after World War II. Transportation has always played a key role in the development of the village, which sits at the crossroads of America's first land grant railroad, the Illinois Central, and the country's first transcontinental road, the Lincoln Highway. Since the 1970s, Matteson has grown into a vibrant retail and commercial area for Chicago's south suburbs. Whether we live in cities, in

birds are ubiquitous features of
daily life, so much so that we
often take them for granted.
But even the casual observer
is aware that birds don't fill our
skies in the number they once
did. That awareness has
spawned conservation action
that has led to notable
successes, including the
recovery of some of the
nation's most emblematic
species, such as the Bald
Eagle, Brown Pelican,
Whooping Crane, and
Peregrine Falcon. Despite this,
a third of all American bird
species are in trouble—in many
cases, they're in imminent
danger of extinction. The most

authoritative account ever published of the threats these species face, The American Bird Conservancy Guide to Bird Conservation will be the definitive book on the subject. The Guide presents for the first time anywhere a classification system and threat analysis for bird habitats in the United States, the most thorough and scientifically credible assessment of threats to birds published to date, as well as a new list of birds of conservation concern. Filled with beautiful color illustrations and original range maps, the Guide is a timely, important, and inspiring reference for birders and anyone else

interested in conserving North America's avian fauna. But this book is far more than another shout of crisis. The Guide also lays out a concrete and achievable plan of long-term action to safeguard our country's rich bird life. Ultimately, it is an argument for hope. Whether you spend your early weekend mornings crouched in silence with binoculars in hand, hoping to check another species off your list, or you've never given much thought to bird conservation, you'll appreciate the visual power and intellectual scope of these pages.
