Getting Started - Building Java Projects with Maven

Getting Started Very quick start. Codehaus Cargo can be directly run on any existing Maven Java EE project (WAR, EAR or other) by running: ... It will also save the downloaded container in the default directory (see the Maven 2 / Maven 3 Plugin Reference Guide for details), so it won't get downloaded when you run the same command twice.

If both exist, the contents are getting merged, with the user settings being dominant (have a look at the Maven Settings Reference for more information.). In contrast to the pom.xml configuration, the configuration in settings.xml needs additional profile configuration, as seen below:
