The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces Graffiti Publications

This book is part of the Army historical community's commemoration of the fiftieth anniversary of World War II. American victory in that conflict was brought about not only by the valor of our fighting men and the immensity of our productive capacity, but also by the availability of superb military intelligence. Much of this intelligence came from the ability of our armed forces to intercept and decipher the most secret communications of their adversaries. For many years security

considerations prevented any public mention of these successes in the official histories. Now much of the story can be told. To preserve the memory of the Army's role in this intelligence war, the U. S. Army Center of Military History has joined with the History Office, U. S. Army Intelligence and Security Command (INSCOM), to publish this collection of documents on Army signals intelligence in World War II. INSCOM carries on the heritage of the Army's World War II Signal Security Agency, which by breaking the Japanese diplomatic ciphers and military codes helped speed the way of our forces to victory. The book is intended both for an Army audience and for the general public - including those World War II veterans who participated in the signals intelligence war and who for so many years were constrained to keep their contributions secret. The security barriers have now been lifted, and the Army is proud to acknowledge those contributions. Harold W. Nelson Charles F. Scanlon Brigadier General, US Army Major General, US Army Chief of Military History Commanding General, US Army Intelligence and Security Command

On 10 November 1775 the Second Continental Congress authorized the raising of two battalions of Marines. From this small beginning we have seen the United States Marine Corps grow into a powerful force for the nation's security. In this volume, through the actions and words of the participants, we read of a small Marine force which promptly challenged Great Britain's control on both land and sea. Our first amphibious raid landed in the Bahamas on 3 March 1776, capturing gravely needed munitions, and proving to the foe that the infant American Marine Corps was a threat to be reckoned with. Likewise we read of small bands of Marines who dared to stand in the way of British troops at Princeton, New Jersey, and Charleston, South Carolina. And we also learn of the little-known Marine expedition down the Mississippi River under naval Captain James Willing in 1778. Historians, past and present, all too often neglect completely the maritime history of the American Revolution or they pass over it with superficial attention. Mr. Charles R. Smith has corrected this omission with respect to Continental Marines. Based on extensive and careful research, the author has rescued from oblivion those actions from which our modern concepts of amphibious warfare have grown. Original artwork used to illustrate this volume was prepared by Major Charles H. Waterhouse, USMCR. A free-lance illustrator, Major Waterhouse's work has appeared in a wide variety of publications, ranging from children's books to his forthright interpretations of the war in Vietnam, published under the titles, Vietnam Sketchbook-Drawings from Delta to DMZ, and Vietnam War Sketches-From the Air, Land and Sea. The original text and artwork have been used in this publication; occasionally there may be instances of imperfections with

these old texts (i.e., blurred or missing pages, poor image quality).

Shantyboat is the story of a leisurely journey down the Ohio and Mississippi rivers to New Orleans. For most people such a journey is the stuff that dreams are made of, but for Harlan and Anna Hubbard, it became a cherished reality. In their small river craft, the Hubbards became one with the flowing river and its changing weathers. This book mirrors a life that is simple and independent, strenuous at times, but joyous, with leisure for painting and music, for observation and contemplation.
