*FORMULA / Motherboards /
ASUS Singapore*

Overclocking the Maximus II
Formula was pretty

straightforward without any
major hurdles. To generate the
overclocked results I was able
to push the bclock up to a
maximum of 218MHz using an
i5 750 and 215Mhz with the i7
870. The Maximus gave up a
bit more clock speed than the
DP55KG did but only by about
95MHz.
