This volume responds to the challenges posed by the rapid developments in satellite TV and digital technologies, addressing media ethics from a global perspective to discuss how we can understand journalism practice in its cultural contexts. An international team of contributors draw upon global and non-Western traditions to discuss the philosophical origins of ethics and the tension that exists between media institutions, the media market and political/ideological influencers. The chapters then unveil the discrepancies among international journalists in abiding by the ethics of the profession and the extent to which media ethics are understood and applied in their local context/environment. Arguing that the legitimacy of ethics comes not from the definition per se, but from the extent to which it leads to social good, the book posits this should be the media's raison d'être to abide by globally accepted ethical norms in order to serve the common good. Taking a truly global approach to the question of media ethics, this volume will be an important resource for scholars and students of journalism, communication studies, media studies, sociology, politics and cultural studies.

I.B.Tauris in association with the Iran Heritage Foundation Of profound importance in late antiquity, the Sasanian Empire is almost completely unknown today, except as a counterpoint to the Roman Empire. What are the reasons for this ignorance and why does the Sasanian Empire matter? In this brilliant and highly readable new history Touraj Daryaee fills a huge gap in our knowledge of world history. He examines the Sasanians' complex and colourful narrative and demonstrates their unique significance, not only for the development of Iranian civilisation but also for Roman and Islamic history. The Sasanians were the last of the ancient Persian dynasties and are best known as the preeminent practitioners of the Zoroastrian religion. From its foundation by Ardashir I in 224 CE, the Sasanian Empire was the dominant force in the Middle East for several centuries until its last king, Yazdgerd III, was defeated by the Muslim Arabs, whose horsemen swept away his seemingly far more powerful empire in the 7th century. There was the first post-Hellenic civilisation in the Near East to operate on an imperial scale and its sphere of influence and contact was unparalleled - from India to the Levant and from the Arabian Peninsula to the Caspian Sea. In this concise yet comprehensive new book, Touraj Daryaee provides an unrivalled account of Sasanian Persia. Drawing on extensive new sources he paints a vivid portrait of Sasanian life and unravels the divergent strands that contributed to the making of this great Empire: religion - not just Zoroastrianism but also Manichaeism; the economy; administration; the multiple languages and their literature as well as the Empire's often neglected social history. Daryaee also explores - for the first time in an integrated book on the Sasanians - their descendants' attempts for more than a century after their defeat to establish a second state and reveals how their values and traditions have endured, both in Iranian popular culture and in the literary tradition of the Persian language and literature, to the present day. Sasanian

Persia is a unique examination of a period of history that still has great significance for a full understanding of modern Iran.

Finalist for the National Book Award, *The Yellow Birds* is the harrowing story of two young soldiers trying to stay alive in Iraq "The war tried to kill us in the spring." So begins this powerful account of friendship and loss. In Al Tafar, Iraq, twenty-one-year-old Private Bartle and eighteen-year-old Private Murphy cling to life as their platoon launches a bloody battle for the city. Bound together since basic training when Bartle makes a promise to bring Murphy safely home, the two have been dropped into a war neither is prepared for. In the endless days that follow, the two young soldiers do everything to protect each other from the forces that press in on every side: the insurgents, physical fatigue, and the mental stress that comes from constant danger. As reality begins to blur into a hazy nightmare, Murphy becomes increasingly unmoored from the world around him and Bartle takes actions he could never have imagined. With profound emotional insight, especially into the effects of a hidden war on mothers and families at home, *The Yellow Birds* is a groundbreaking novel that is destined to become a classic.

Psychology: Themes and Variations Routledge

Iran's Revolutionary Guard Corps, also known as the 'Sepah', has wielded considerable and increasing power in Iran in recent decades. Established in 1979 by Ayatollah Khomeini as a paramilitary organisation charged with protecting the nascent Islamic regime and countering the untrustworthy Imperial army (or 'Artesh'), the Sepah has evolved into one of the most powerful political, ideological, military and economic players in Iran over recent years. The Sepah is entrusted with a diverse set of indoctrination apparatus, training programmes and system welfare provisions intended to broaden support for the regime. Although established as a paramilitary organisation, the Sepah developed to have its own ministry, complex bureaucracy and diversified functions, alongside its own network and personnel. This book provides a comprehensive overview of the Sepah and its role. It examines the position of the Sepah in Iranian state and society, explores the nature of the Sepah's involvement in politics, and discusses the impact of the Sepah's political rise on Iran's economy and foreign policy. Contemporary Iran can only be fully understood by an awareness of the ongoing in-fighting among regime factions and increasing popular demands for social change - knowing about the Sepah is central to all this.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early

learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Move to Global War BRILL

Amid the extensive coverage of the Arab uprisings, the Gulf state of Bahrain has been almost forgotten. Fusing historical and contemporary analysis, Bahrain's Uprising seeks to fill this gap, examining the ongoing protests and state repression that continues today. Drawing on powerful testimonies, interviews, and conversations from those involved, this broad collection of writings by scholars and activists provides a rarely heard voice of the lived experience of Bahrainis, describing the way in which a sophisticated society, defined by a historical struggle, continues to hamper the efforts of the ruling elite to rebrand itself as a liberal monarchy.

Written by Debra Kidd, *Curriculum of Hope: As rich in humanity as in knowledge* explores how good curriculum design can empower schools to build bridges between their pupils' learning and the world around them. A great many schools are wondering how they can build a curriculum model that meets the demands of government policy as well as the needs of the children and communities they serve. In *Curriculum of Hope*, Debra illustrates how teachers can deliver learning experiences that genuinely link knowledge to life. Working on the premise that a strong curriculum is supported by five key pillars of practice coherence, credibility, creativity, compassion and community she presents a plethora of examples that demonstrate how schools, parents, pupils and the wider local community can learn together to build from within. Debra enquires into the ways in which schools can create units of work that are both knowledge- and humanity-rich, and challenges the view that the role of children is simply to listen and learn instead advocating their active engagement with local and global issues. She does so by delving into the role of pedagogy as a means of empowering children, and by exploring some of the more overlooked pedagogical tools that can have a great impact on children's learning and well-being story, movement and play as well as some of the recent research into memory and retention. Towards the back of the book you will find case studies demonstrating how teachers can work with both their own and other subject departments across the school to plan in ways that allow for pupil choice, autonomy and responsibility. Furthermore, there are some accompanying planning documents for these examples provided in the appendix (*The Seed Catalogue*) which you may find useful, and these documents are also available for download. Suitable for teachers and leaders in all schools.

100 Puzzles from Then and Now John Wiley & Sons

For decades, scholars have been trying to answer the question: how was colonial Burma perceived in and by the Western world, and how did people in countries like the United Kingdom and United States form their views? This book explores how Western perceptions of Burma were influenced by the popular music of the day. From the First Anglo-Burmese War of 1824-6 until Burma regained its independence in 1948, more than 180 musical works with Burma-related themes were written in English-speaking countries, in addition to the many hymns composed in and about Burma by Christian missionaries. Servicemen posted to Burma added to the lexicon with marches and ditties, and after 1913 most movies about Burma had their own distinctive scores. Taking Rudyard Kipling's 1890 ballad 'Mandalay' as a critical turning point, this book surveys all these works with emphasis on popular songs and show tunes, also looking at classical works, ballet scores, hymns, soldiers' songs, sea shanties, and film soundtracks. It examines how they influenced Western perceptions of Burma, and in turn reflected those views back to Western audiences. The book sheds new light not only on the West's historical relationship with Burma, and the colonial music scene, but also Burma's place in the development of popular music and the rise of the global music industry. In doing so, it makes an original contribution to the fields of musicology and Asian Studies.
