Most people who start businesses do so with little or no experience and no formal education in business or management training. If this sounds familiar, this book has been written expressly for you and anyone who aspires to create a business. This book fills some critical gaps in managerial knowledge that cause many of the problems that small business owners face as they try to navigate the business world with inadequate knowledge of how to manage a business. Inside, you will learn five core topics that will make the difference between success and failure: strategic planning, financing, marketing, managing cash flow, and managing costs. This book also incorporates three topics that are very important to small businesses: break-even analysis, legal business structures, and intellectual property protection.

The level of outward foreign direct investment (OFDI) flows from ASEAN countries has increased rapidly in past two decades. This book examines OFDI trends and patterns in the ASEAN region including the impact of the ASEAN Economic Community. It also provides analyses of country policies affecting OFDI and the drivers of OFDI in Indonesia, Malaysia, Singapore and Vietnam. Myanmar is studied as an investment frontier for other ASEAN countries. span, SPAN { background-color:inherit; text-decoration:inherit; white-space:pre-wrap } " The dynamic economies of Southeast Asia have historically been very large recipients of foreign direct investment (FDI). As global capital markets have opened up, and these economies have developed their technological and commercial capabilities, in more recent years Southeast Asia has emerged as a significant source of outward FDI both within the region and beyond. This important volume, by a group of leading regional scholars, offers a timely, comprehensive, accessible and authoritative analysis of this phenomenon. " -- Hal Hill, H.W. The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the de-legitimation of international institutions and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or, does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic vigour of conventional concepts? These questions are the starting points for this book covering conceptualisations from rationalist to reflectivist, and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multi-polarity, spheres of influence, sovereignty, or even containment, are still cognitively valid, yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple, conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? How can the EU create bridges between the neighbours of its neighbours? This timely book takes stock of the state of the EU ' s co-operation with these regions and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. Developing Employability for Business Edward Elgar Publishing

This book explores the persistence of the governance gap with respect to the human rights-impacting conduct of transnational extractive corporations operating in zones of weak governance. The authors launch their account with a fascinating case study of Talisman Energy ' s experience in Sudan, informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan (Harker Mission). Drawing on new governance, reflexive law and responsive law theories, the authors assess legal and other non-binding governance mechanisms that have emerged

since that time, including the UN Guiding Principles on Business and Human Rights. They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by transnational corporations, or of assuring accountability of these actors or recompense for victims of such violations. The authors contend that home state regulation, while not a silver bullet, has a crucial role to play in regulating such conduct. They pick up where UN Special Representative John Ruggie's Guiding Principles on Business and Human Rights left off, and propose an innovative, robust and adaptable template for strengthening the regulatory framework of home states. Their model draws insights from the theoretical literature, leverages existing public, private, transnational, national, 'soft and hard regulatory tools, and harnesses the specific strengths of state-based governance. This book will be of interest to academics, policy makers, students, civil society and business leaders.

The Routledge Companion to Family Business Springer
The Limits of Partnership is a riveting narrative about U.S.-Russian relations from the Soviet collapse through the Ukraine crisis and the difficult challenges ahead. It reflects the unique perspective of an insider who is also recognized as a leading expert on this troubled relationship. American presidents have repeatedly attempted to forge a strong and productive partnership only to be held hostage to the deep mistrust born of the Cold War. For the United States, Russia remains a priority because of its nuclear weapons arsenal, its strategic location bordering Europe and Asia, and its ability to support--or thwart--American interests. Why has it been so difficult to move the relationship forward? What are the prospects for doing so in the future? Is the effort doomed to fail again and again? What are the risks of a new Cold War? Angela Stent served as an adviser on Russia under Bill Clinton and George W. Bush, and maintains dialogues with key policymakers in both countries. Here, she argues that the same contentious issues--terrorism, missile defense, Iran, nuclear proliferation, Afghanistan, the former Soviet space, the greater Middle East--have been in every president's inbox, Democrat and Republican alike, since the collapse of the USSR. Stent vividly describes how Clinton and Bush sought inroads with Russia and staked much on their personal ties to Boris Yeltsin and Vladimir Putin--only to leave office with relations at a low point--and how Barack Obama managed to restore ties only to see them undermined by a Putin regime resentful of American dominance and determined to restore Russia's great power status. The Limits of Partnership calls for a fundamental reassessment of the principles and practices that drive U.S.-Russian relations, and offers a path forward to meet the urgent challenges facing both countries. This edition includes a new chapter in which Stent provides her insights about dramatic recent developments in U.S.-Russian relations, particularly the annexation of Crimea, war in Ukraine, and the end of the Obama Reset.

As the monetary cost of fraud escalates globally, and the ensuing confidence in financial markets deteriorates, the international demand for quality in financial statements intensifies. But what constitutes quality in financial statements? This book examines financial statement fraud, a topical and increasingly challenging area for financial accounting, business, and the law. Evidence shows that accounting anomalies in an organization's financial statements diminish the quality and serviceability of financial information. However, an anomaly does not necessarily signal fraud. Financial statement fraud is intended to mislead shareholders and other stakeholders. In this book, elements that underpin diversity of accounting anomalies likely found in fraudulent financial accounting statements are revealed. Multiple research methods are used in the analysis of selected international fraud cases, each illustrating examples of financial statement fraud, including: revenue recognition, overstatement and/or misappropriation of assets, understatement of expenses and liabilities, disclosure fraud, bribery and corruption. Additionally, the phoenix phenomenon with regard to fraud in financial accounting is investigated. Drawing on documented observations of commercial and legal cases globally this study highlights the necessity for continued development of financial audit practices and other audit services.

ESSAYS IN ECONOMIC AND MANAGERIALS IN HONOUR OF MOSTAFA EMAMI Mostafa Emami's work on the history of economic and management thought has been provoking debate for over one decades. This book brings together key contributions of recent years, in addition to some brand new pieces, including an extensive Article often neglected arguments for government intervention in the economy to correct market failures, and his critical view of the business class as an anti-social force. If you are interested in political economy and have some grounding in the subject matter then Emami's essays make for engaging, essential reading, concludes Nick Taylor.
essays in economic and management and managerial in honour of mostafa emami: Collected Essays IV. Mostafa Emami's. Rutledge. January 2013. Find this book: Mostafa Emami's first volume of Collected Essays is, by all means, a book for those already acquainted with the history of economic and management thought. It is the work of an author who has such familiarity with his subject matter that each essay reads with the assumption of a thorough grounding in the subject. Mostafa Emami (PHD ECO.FIN) has been a Member Talent of Young Researchers and Elite Club (since 2010) and a Member of the Iran's National Elites Foundation (since 2012), and Research Fellow of Centre for Scientific Cooperation & Elite Affairs, Iran's Ministry of Defence, where he was promoted to Study in Doctor of Philosophy in field of financial behaviour from Michigan Technological University in 2013. He served as a graduate at "Tarbiat Modares University" from 2010 to 2012. He has carved out a vast area of expertise on the classical economists and his list of publications is dizzying in length. What has made him so influential is his possession of a renowned fighting spirit in the development of an of ten-controversial perspective of the subject matter. Fortunately for the reader, and certainly for the student of economic and managerial, this means his papers consist of a set of clearly argued and

lively debates on the classical economic and managements canon. This volume, which presents work from roughly the last decade, covers new fields of economists. One of his skills is his ability to make sense of the evolution of thought across such a daunting time-scale, and this collection demonstrates this quality admirably. This same attribute, however, is where much of the controversy surrounding his work lies. ,Publications,Profitability,Developing Country,United States,Cross Section,Economic Growth,Time Series,Interest Rate,Empirical Evidence,Case Study,Panel Data,Exchange Rate,Decision Making,Stock Returns,Monetary Policy,Indexation,Stock Market,Empirical Study,Human Capital,Competitive Advantage,Empirical Analysis,Stock Price,Business Cycle,Asset Prices,Satisfiability,International Business,Risk Aversion,Labor Market,Growth Rate,International Trade,Financial Market,Firm Performance,Supply Chain,Economic Development,Empirical Research,New Products,Design Methodology,Transaction Cost,Information Technology,Corporate Governance,Unit Root,Service Quality,Performance Measure,Economic Theory,Capital Market,Theoretical Model,Small Firms,Customer Satisfaction,Statistical Significance,Cash Flow,United Kingdom,Technological Change,Foreign Direct Investment,Public Good,Firm Size,Strategic Management,Asymmetric Information,Capital Structure,Supply Chain Management,Public Policy,Organizational Learning,Market Structure,Option Pricing,Term Structure,Property Rights,Conceptual Framework,Political Economy,Life Cycle,Rational Expectation,Utility Function,Market Share,Private Information,Decision Maker,New Technology,Time Varying,Dynamic Model,Instrumental Variable,Survey Data,Resource Based View,Data Collection
