Books and Learning Private Limited The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. Paper P3 is called

Business Analysis, accountancy but it covers the whole field of business and corporate strategy, including the choice and implementation of courses of action. For accountants, the overall purpose of studying this subject is to be able to make proper contributions to the strategic management of whatever organisations they find themselves working in. To do this requires the acquisition and considered use of theory lying well outside the mainstream of financial and topics. In addition to the core material relating to business strategy, there are strong links to the fields of economics, marketing and human behaviour. The P3 Study Text is based on the primary authorities specified in the official syllabus reading list; it is supplemented by a wide range of other material that extends, amplifies and, in some cases, clarifies the basic references. The study material is thus selected and presented in an easily used form that has been approved by the

Examiner. The syllabus emphasises the integrated nature of the subject and the Study Text points up the links between the various topics. The ability to discern and use these links is likely to be of great importance in the examination. ACCA Paper F4 - Corp and Business Law (GLO) Practice and revision kit

Since the sudden opening of the markets in Central and Eastern Europe (CEE) in 1989, there has been a growing need to investigate the fundamental changes occurring in the countries' marketing environment, the lucrative market opportunities created by the changes, and the inscrutable marketing

practice followed by local and international companies. Marketing in Central and Eastern Europe helps you understand the changes taking place in these valuable and challenging markets and introduces you to the emerging opportunities and effective marketing strategies to be employed in the region. Researchers specializing in CEE business; managers of international companies operating in or contemplating

entering CEE markets; and students studying CEE business, East-West business, or marketing in transitional economies will better understand the region by examining issues of cross-cultural inquiry, commonality, and market segmentation. Marketing in Central and Eastern Europe also provides you with: a region-relevant market analysis to determine environmental dimensions of emerging markets a preliminary report on market-

entry strategies in Poland an assessment of foreign direct investment opportunities in Hungary a study of Western-style marketing applied in transitional economies an analysis of marketization and Westernization used as classifying dimensions information on increasing the validity of post-command economy research and application Although the book's chapters cover a variety of topics and use different research approaches and methodologies,

they have a common theme--there is a great interest in, and an equally great need to scientifically investigate, rapidly emerging market opportunities, marketing-environment issues, and marketing-strategy problems with respect to transitional economies of Central and Eastern Europe.
