The enlightening, best-selling book on understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from - and where it could come from - but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. Sustainable Energy - without the hot air addresses the energy crisis objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale - for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book - it's an honest, realistic, and humorous discussion of all our energy options.

Malcolm Gladwell, host of the podcast
Revisionist History and author of the #1 New
York Times bestseller Outliers, offers a
powerful examination of our interactions
with strangers and why they often go
wrong—now with a new afterword by the
author. A Best Book of the Year: The
Financial Times, Bloomberg, Chicago Tribune,
and Detroit Free Press How did Fidel Castro
fool the CIA for a generation? Why did
Neville Chamberlain think he could trust
Adolf Hitler? Why are campus sexual assaults
on the rise? Do television sitcoms teach us
something about the way we relate to one
another that isn't true? Talking to
Strangers is a classically Gladwellian
intellectual adventure, a challenging and
controversial excursion through history,
psychology, and scandals taken straight from
the news. He revisits the deceptions of
Bernie Madoff, the trial of Amanda Knox, the
suicide of Sylvia Plath, the Jerry Sandusky
pedophilia scandal at Penn State University,
and the death of Sandra Bland—throwing our
understanding of these and other stories
into doubt. Something is very wrong,
Gladwell argues, with the tools and
strategies we use to make sense of people we
don't know. And because we don't know how to
talk to strangers, we are inviting conflict
and misunderstanding in ways that have a
profound effect on our lives and our world.
In his first book since his #1 bestseller
David and Goliath, Malcolm Gladwell has
written a gripping guidebook for troubled
times.
