2009 Mazda 6 with 21,000 miles - DSC light keeps coming on. Is this a Mfg problem? Also, I cannot put car in gear from - Answered by a verified Mazda Mechanic

The Dynamic Stability Control system (DSC) automatically takes control of the vehicle when skidding is detected. The system guards against skidding by optimally controlling engine output and the braking force applied to each wheel through the combined control of the 4-wheel antilock braking system and the Traction Control System (TCS).
