With the exception of modern warfare, no other human activity has destroyed as

many lives as driving a motor vehicle. Traffic crashes kill and injure thousands of Canadians every year at an incalculable financial and emotional cost to society—but rather than rush to stem this tide of human carnage, policy-makers seem to accept the ghastly toll as the price we pay for mobility. *Driving Lessons* takes a fresh look at the complexities of the road transportation system in depth, going far beyond the symptomatic, linear, reductionist approach. It challenges current traffic

safety paradigms that simply blame the driver or target "villains and scapegoats" like impaired or high-risk drivers. It takes issue with road transportation system management that sometimes puts mobility ahead of the safety of road users. As one researcher notes, human beings will make mistakes, and accordingly, "the road transportation system must be designed so that people's mistakes do not have disastrous consequences." *Driving Lessons* University of Alberta Popular Mechanics inspires, instructs and

Change! Clinical psychologist and transformative communication expert Dr. Nate Regier believes that the biggest energy crisis facing our world is the misuse of conflict. Most organizations are terrified of conflict, seeing it as a sign of trouble. But conflict isn't the problem, says Regier. It's all about how we use the energy. When people misuse conflict energy, it becomes drama: they struggle against themselves or each other to feel justified about their negative behavior. The cost to companies, teams, and relationships is staggering. The alternative, says Regier, is compassionate accountability: struggling with others through conflict. Discover the Compassion Cycle, an elegant model for balancing empathy, care, and transparency with boundaries, goals, and standards.

Provocative, illuminating, and highly practical, this book helps us avoid the casualties of conflict through openness, resourcefulness, and persistence.
