A destitute tenant farmer, in Pyung Yang, Korea, gives away his twelve year old son to the nationalist patriot, Doh Sahn, in 1908. Following the ardent Patriot, thrusts the teenager into the midst of an international struggle raging in the Korean Peninsula. Japan proceeds to annex Korea into the Japanese Empire. The Patriot fights to thwart the annexation. As the Japanese police close in, the Patriot and the teenager escape to Tsingtao and Vladivostok; the two finally reach New York in 1911, as Korea is no more. The teenager struggles alone to survive in America, and enters Asbury College in Kentucky. Rev. Robert Nahm-Soo Chung in 1926 returns to his homeland. His Evangelistic Crusade Team carries a huge tent of six thousand capacity, on a van-truck provided by American campgrounds and churches. The Team travels even to the remote areas of the Peninsula. He preaches to the throngs suffering under the Japanese, during their darkest hours. Hundreds of thousands of people come to Jesus. He suffers torture in the Japanese prison, for preaching the gospel, and for his close tie with the Patriot. You will walk through his tears and triumphs to preach the gospel. Paul M. Chung, PH.D, is a retired engineering Professor and Dean Emeritus of an engineering college.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Ever wanted to ameliorate your atavistic lexicon, engage in a little intellectual badinage or been discombobulated by tricky diction? 500 Words You Should Know has you covered. Words are beautiful and versatile things, but when used incorrectly they can lose a lot in transition, and the more complex the word, the more misused it can become. And as words eternally evolve in their everyday use, they can begin to be interpreted as something other than their original meaning. 500 Words You Should Know will inspire the reader to use uncommon words in their correct context, to utilize the English language to its full potential, and to test themselves on the words they think they already know.

When Papo, a tough-talking Puerto Rican hustler from the Bronx, meets Brian, a frightened young lawyer from the Midwest, Papo begins to glimpse the possibility of a romantic escape from his life on the streets. At the same time, Bobby, a 17-year-old runaway who has been repeatedly raped by his older brother, offers to take care of Papo and moves in with him in his fleabag hotel room. It is then when Papo suddenly finds his defenses melting and his heart torn in two directions. TRAFFICKING IN BROKEN HEARTS is a gritty, urban love story. "Playwright Edwin Sanchez makes a promising New York debut with TRAFFICKING IN BROKEN HEARTS, a grim, streetwise and bracingly compassionate work ... he convinces with the honesty of his writing and a canny, thoughtful grasp of his trio of characters. The playwright does an especially effective job in penning the gray shades of his characters ..." -Greg Evans, Variety

This is a complete reference guide to automotive electrics and electronics. This new edition of the definitive reference for automotive engineers, compiled by one of the world's largest automotive equipment suppliers, includes new and updated material. As in previous editions different topics are covered in a concise but descriptive way backed up by diagrams, graphs, photographs and tables enabling the reader to better comprehend the subject. This fifth edition revises the classical topics of the vehicle electrical systems such as system architecture, control, components and sensors. There is now greater detail on electronics and their application in the motor vehicle, including electrical energy management (EEM) and discusses the topic of inter system networking within the vehicle. It also includes a description of the concept of hybrid drive a topic that is particularly current due to its ability to reduce fuel consumption and therefore CO2 emissions. This book will benefit automotive engineers and design engineers, automotive technicians in training and mechanics and technicians in garages. It may also be of interest to teachers/ lecturers and students at vocational colleges, and enthusiasts.

Interfacing with C is about interfacing personal computers using C. Anyone who is interested in ports, transducer interfacing, analog to digital conversion, convolution, filters or digital/analog conversion will benefit from reading Interfacing with C. Students will also find this a practical introduction to real-time programming with a generous collection of tried and tested programs. The pace of the book is such that the reader is encouraged to run the programs and experiment with C. The principles precede the applications in most cases in an attempt to provide genuine understanding and encourage further development. Readers will gain much from the hands-on experience the authors' approach provides, an approach designed to enable readers to climb steep learning curves with the minimum amount of assistance. The many programs included in the text provide the essential hands-on experience. Some of the programs inevitably become rather lengthy, so the source code used is available as a free download from the Newnes website. The aim of the book, however, is to give the reader enough confidence to rewrite and improve these programs. In the second edition Mike James has thoroughly updated all aspects relating to software, operating systems and graphical interfaces. He has also increased the scope of the book to include current forms of C++. Material on data acquisition has been thoroughly updated and the section on peripherals increased. A disk containing the source code for the listings in the book is available from 'Electronics World' magazine, tel. 020 8722 6054. In 1973, conventional industry wisdom was that a country music station could not be successful in the New York market. WHN ignored that wisdom and announced that it was switching from a middle-of-the-road format to country, billing itself as "Easy Lovin' Country." The actual changeover took place at 5:45 am on February 26th when Jack Spector, calling himself "The Kosher Cowboy From Coney Island," introduced the George Jones classic "The Race Is On." And the rest is history.

BEGINNING ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master algebraic concepts, problem solving, and communication skills. Students learn how to solve problems generated from realistic applications, instead of learning techniques without conceptual understanding. The authors have developed several key ideas to make concepts real and vivid for students. First, they emphasize strong algebra skills. These skills support the applications and enhance student comprehension. Second, the authors integrate applications, drawing on realistic data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Third, the authors develop key concepts as students progress through the course. For example, the distributive property is introduced in real numbers, covered when students are learning how to multiply a polynomial by a constant, and finally when students learn how to multiply a polynomial by a monomial. These concepts are reinforced through applications in the text. Last, the authors' approach prepares students for intermediate algebra by including an introduction to material such as functions and interval notation as well as the last chapter that covers linear and quadratic modeling.
