In 1973, conventional industry wisdom was that a country music station could not be successful in the New York market. WHN ignored that wisdom and announced that it was switching from a middle-of-the-road format to country, billing itself as "Easy Lovin' Country." The actual changeover took place at 5:45 am on February 26th when Jack Spector, calling himself "The Kosher Cowboy From Coney Island," introduced the George Jones classic "The Race Is On." And the rest is history.

A destitute tenant farmer, in Pyung Yang, Korea, gives away his twelve year old son to the nationalist patriot, Doh Sahn, in 1908. Following the ardent Patriot, thrusts the teenager into the midst of an international struggle raging in the Korean Peninsula. Japan proceeds to annex Korea into the Japanese Empire. The Patriot fights to thwart the annexation. As the Japanese police close in, the Patriot and the teenager escape to Tsingtao and Vladivostok; the two finally reach New York in 1911, as Korea is no more. The teenager struggles alone to survive in America, and enters Asbury College in Kentucky. Rev. Robert Nahm-Soo Chung in 1926 returns to his homeland. His Evangelistic Crusade Team carries a huge tent of six thousand capacity, on a van-truck provided by American campgrounds and churches. The Team travels even to the remote areas of the Peninsula. He preaches to the throngs suffering under the Japanese, during their darkest hours. Hundreds of thousands of people come to Jesus. He suffers torture in the Japanese prison, for preaching the gospel, and for his close tie with the Patriot. You will walk through his tears and triumphs to preach the gospel. Paul M. Chung, PH.D, is a retired engineering Professor and Dean Emeritus of an engineering college.

For those of you with a taste for the mysterious, this book should prove to be a tempting prospect. Scotland has always had a reputation for holding dark secrets through the ages and Ron Halliday's new book delves into the subject with descriptive vigour and a clarity that transports the reader to the very heart of the unexplained. With Unidentified Flying Objects, ghosts, the occult and other inexplicable supernatural phenomena included, the book deals with a wide range of well-known and much-researched cases, each strange, disturbing and

fascinating in their own way. Many parts of Scotland have provided the stage for these disquieting events, and famous landmarks are mentioned alongside lesser known locations. Halliday's book is worthwhile reading for all who have an interest in the paranormal, not only because it is written in an informative and accessible style, but because it researches events from a country whose name is synonymous with a mysterious past.

The product of twenty years' research, this is the first book to study the way religious concerns permeated Achaemenian culture, deeply influencing such varied things as categories of space, time, number, and causality; constructions of nature, humanity, and moral order; institutions of law, education, and kingship; practices of diplomacy, tribute, irrigation and gardening (including the sumptuous royal gardens designated as "paradises"). Particular attention is devoted to the role of cosmogonic myths, dualistic ethics, demonological beliefs, the ideology of royal charisma, the sense of Persia as a sacred center, and the conviction that Achaemenian rulers bore unique responsibility for restoring the world's lost perfection and realizing God's plans for creation: a task to be accomplished by reuniting the globe's tragically fragmented peoples.

Interfacing with C is about interfacing personal computers using C. Anyone who is interested in ports, transducer interfacing, analog to digital conversion, convolution, filters or digital/analog conversion will benefit from reading Interfacing with C. Students will also find this a practical introduction to real-time programming with a generous collection of tried and tested programs. The pace of the book is such that the reader is encouraged to run the programs and experiment with C. The principles precede the applications in most cases in an attempt to provide genuine understanding and encourage further development. Readers will gain much from the hands-on experience the authors' approach provides, an approach

designed to enable readers to climb steep learning curves with the minimum amount of assistance. The many programs included in the text provide the essential hands-on experience. Some of the programs inevitably become rather lengthy, so the source code used is available as a free download from the Newnes website. The aim of the book, however, is to give the reader enough confidence to rewrite and improve these programs. In the second edition Mike James has thoroughly updated all aspects relating to software, operating systems and graphical interfaces. He has also increased the scope of the book to include current forms of C++. Material on data acquisition has been thoroughly updated and the section on peripherals increased. A disk containing the source code for the listings in the book is available from 'Electronics World' magazine, tel. 020 8722 6054. A practical and painless way of becoming an expert C programmer New edition also covers C++ and the Windows environment Get up to speed with the essential maths needed for C without having to buy a university maths text!
