A daily diary of actual interactions between a  
reference desk librarian and his patrons  
Reference Librarianship documents a year in  
the life of a young librarian working in the  
“ trenches ” at a library in the Midwestern  
United States. This one-of-a-kind book  
provides a daily diary of every librarian/patron  
transaction—no matter how mundane or  
absurd—to demonstrate not only how  
advances in technology have affected the

reference librarian ’ s job, but how the  
public ’ s expectations have changed, as well.  
The book also includes observations by a now-  
retired reference librarian on the current state  
of the field based on these unedited  
interactions. Over the past two decades, the job  
of reference librarian has seen many changes.  
But in many ways, reference desk work hasn ’ t  
changed a bit, with its mix of odd, humorous,  
routine, and ridiculous requests that capture  
what it ’ s like to deal with patrons day after  
day. Reference Librarianship paints a clear  
picture of the field for library school students,  
provides emotional and philosophical support  
to practitioners, and reminds library  
administrators of what life was like on the  
“ front lines. ” A sampling of the daily  
transactions documented in Reference  
Librarianship: Monday, May 19, 2003: pencil  
pencil network down I tell people that I can ’ t

sign them up for an Internet terminal because  
the network is down and they just stand there,  
staring into space One of them asks for three  
days worth of newspapers microfiche machine  
explanation Sorry, Sir, the network is still down  
(multiply by twenty and insert randomly into  
the remainder of the day) magic tricks, but he  
pretty much knew where they were One of our  
large interior plate glass windows shattered. No  
one was hurt and it made a fascinating noise,  
like a crystal waterfall landing on soil. “ Books  
on prostitution, you know—whores? ”  
Someone from the County called to ask if any  
criminal activity had occurred on a particular  
street. Someone else referred her to us. She was  
dubious—with good reason. “ Math puzzles. ”  
Okay. I show him the books. “ Just math. ”  
Certainly. I show him the books. “ I need them  
in Spanish. ” Grrr ... Reference Librarianship  
is an enlightening, educational, and

entertaining look at the real world of reference desk work. It ' s an essential read for reference librarians (both public and academic), library administrators, and library school students, as well as anyone who works with the public.

Over the last few years, IBM®  
IMSTM and IMS tools have been  
modernizing the interfaces to  
IMS and the IMS tools to bring  
them more in line with the  
current interface designs. As  
the mainframe software products  
are becoming more integrated  
with the Windows and mobile  
environments, a common approach  
to interfaces is becoming more

relevant. The traditional 3270  
interface with ISPF as the main  
interface is no longer the only  
way to do some of these  
processes. There is also a need  
to provide more of a common  
looking interface so the tools  
do not have a product-specific  
interface. This allows more  
cross product integration.  
Eclipse and web-based  
interfaces being used in a  
development environment,  
tooling using those  
environments provides  
productivity improvements in  
that the interfaces are common  
and familiar. IMS and IMS tools  
developers are making use of  
those environments to provide  
tooling that will perform some  
of the standard DBA functions.  
This book will take some  
selected processes and show how  
this new tooling can be used.  
This will provide some  
productivity improvements and  
also provide a more familiar  
environment for new generations  
DBAs. Some of the functions

---

normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases
