ESSENTIALS OF  
STRATEGIC  
MANAGEMENT, Third  
Edition, is a brief version of  
the authors' market-leading  
text STRATEGIC  
MANAGEMENT: AN  
INTEGRATED  
APPROACH. Following the

larger book, *ESSENTIALS* helps students identify and focus on core concepts in the field in a more succinct, streamlined format. Based on real-world practices and current thinking, the text's presentation of strategic management features an increased emphasis on the business model concept as a way of framing the issues of competitive advantage. Cutting-edge research, new strategic management theory, and a hands-on approach allow students to explore major topics in management,

including corporate performance, governance, strategic leadership, technology, and business ethics. In addition, a high-quality case program examines small, medium, and large companies--both domestic and international--so that students gain experience putting chapter concepts into real-world practice in a variety of scenarios. The economies of South Korea and Taiwan in the second half of the twentieth century are to scholars of economic development what the economy of Britain in the late eighteenth and early nineteenth centuries is to economic historians. This book, first published in 2006, is a collaboration between a leading trade economist and a leading economic sociologist specializing in East Asia, and offers an explanation of the development paths of post-World War II Korea and Taiwan. The ambitions of the

---

authors go beyond this, however. They use these cases to reshape the way economists, sociologists, and political scientists will think about economic organization in the future. They offer nothing less than a theory of, and extended evidence for, how capitalist economies become organized. One of the principal empirical findings is that a primary cause for the industrialization of East Asia is the retail revolution in the United States and the demand-responsiveness of Asian manufacturers.

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to

choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals,

---

but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

Readers can relive the true golden age of high-performance classic speedboats in this book that covers these mighty wooden-hulled craft from around World War I until just before the second World War. This was

an era when speed was still a new plaything, and speedboats and aircraft were raced as passionately as were automobiles; when massive mahogany speedboats powered by engines from suppliers such as Rolls-Royce competed fiercely against rivals from around the world. Classic speedboat enthusiasts will relish the cutaway drawings of these craft, as well as the choice archival photography and the modern color photography of these now-impeccably restored beauties.

Since the mid-1990s, the emergence of a hydrogen economy and the speed with which it will arrive have been vigorously debated. As a disruptive technology, dominant designs for the production, storage and distribution of hydrogen have not yet been established. Neither have performance characteristics been achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development

policies on national energy, environment and transport sector.--Publisher's description.
