This is a historical and factual commentary on Herodotus book 6, which aims to assess the reality behind Herodotus' account of the years from the Ionian revolt to Miltiades' death. Further related material is discussed in a series of appendices.

Industrialization and the State

Springer Nature

Launch! Advertising and Promotion is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its

kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag "A Fuller Spectrum of News." Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look "behind the curtain" - even letting you see some of the paths not chosen by

the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State

University, Johnson County
Community College, Manchester
Business School, McLennan
Community College, Michigan
State University, North Hennepin

This dissertation examines the
evolution of Western and Modern
architecture in Siam and

Thailand. It illustrates how various
architectural ideas have
contributed to the physical design
and spatial configuration of places
associated with negotiation and
allocation of political power,
which are throne halls,
parliaments, and government and
civic structures since the 1850s.

Modern cars are more
computerized than ever.
Infotainment and navigation
systems, Wi-Fi, automatic
software updates, and other

innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between	devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: – Build an accurate threat	model for your vehicle – Reverse engineer the CAN bus to fake engine signals – Exploit vulnerabilities in diagnostic and data-logging systems – Hack the ECU and other firmware and embedded systems – Feed exploits through infotainment and vehicle-to-vehicle communication systems – Override factory settings with performance-tuning techniques – Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to

This book gathers high-
quality papers presented at
the International Conference
on Smart Trends for
Information Technology and
Computer Communications
(SmartCom 2020), organized
by the Global Knowledge
Research Foundation (GR

Foundation) from 23 to 24
January 2020. It covers the
state-of-the-art and emerging
topics in information,
computer communications,
and effective strategies for
their use in engineering and
managerial applications. It
also explores and discusses
the latest technological
advances in, and future
directions for, information
and knowledge computing
and its applications.

Praise for Carbon Finance "A
timely, objective, and informative
analysis of the financial
opportunities and challenges
presented by climate change,
including a thorough description
of adaptive measures and
insurance products for managing
risk in a carbon constrained
economy." —James R. Evans, M.
Eng. P. Geo., Senior Manager,
Environmental Risk
Management, RBC Financial
Group "Climate change will have
enormous financial implications
in the years to come. How
businesses and investors respond

to the risks and opportunities from this issue will have an enormous rippling effect in the global economy. Sonia Labatt and Rodney White's insights and thoughtful analysis should be read by all who want to successfully navigate this global business issue." —Andrea Moffat, Director, Corporate Programs, Ceres "In Carbon Finance, Labatt and White present a clear and accessible description of the climate change debate and the carbon market that is developing. Climate change is becoming an important factor for many financial sector participants. The authors illustrate how challenges and opportunities will arise within the carbon market for banking,

insurance, and investment activities as well as for the regulated and energy sector of the economy." —Charles E. Kennedy, Director and Portfolio Manager, MacDougall, MacDougall & MacTier Inc. "Climate change is the greatest environmental challenge of our generation. Its impact on the energy sector has implications for productivity and competitiveness. At the same time, environmental risk has emerged as a major challenge for corporations in the age of full disclosure. Carbon Finance explains how these disparate forces have spawned a range of financial products designed to help manage the inherent risk. It is necessary

reading for corporate executives facing challenges that are unique in their business experience." —Skip Willis, Managing Director Canadian Operations, ICF International "In this timely publication, Labatt and White succeed in communicating the workings of carbon markets, providing simple examples and invaluable context to the new and changing mechanisms that underpin our transformation to a carbon-constrained world. Carbon Finance will be the definitive guide to this field for years to come." —Susan McGeachie, Director, Innovest Strategic Value Advisors, Graduate Faculty Member, University of Toronto; and Jane

Guide to Japan's Auto Industry,

Facts & Info Morgan Kaufmann
This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and

whether we now see an end of an alternative to Japanese lean production.

Carbon Finance Pearson Education

Students enjoy the concise and approachable style of Strategic Management: Concepts and Cases, 4e. Written in an accessible Harvard Business Review style with lots of practical examples and strategy tools, this course engages students with an easy-to-understand learning experience to strategic management concepts that will help

students succeed in today's workplace. The newest edition of Strategic Management sparks ideas, fuels creative thinking and discussion, while engaging students via contemporary examples, outstanding author-produced cases, and much more.

Japanese Current Research Haynes Publications

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata 's popularity has grown, and the number of

aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not

only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

This open access book provides a concise yet comprehensive overview on how to build a quality management program for hematopoietic stem cell

transplantation (HSCT) and cellular therapy. The text reviews all the essential steps and elements necessary for establishing a quality management program and achieving accreditation in HSCT and cellular therapy. Specific areas of focus include document development and implementation, audits and validation, performance measurement, writing a quality management plan, the accreditation process, data management, and maintaining a quality

management program.
Written by experts in the field, *Quality Management and Accreditation in Hematopoietic Stem Cell Transplantation and Cellular Therapy: A Practical Guide* is a valuable resource for physicians, healthcare professionals, and laboratory staff involved in the creation and maintenance of a state-of-the-art HSCT and cellular therapy program.

This compilation of 22 firm-specific case studies is an

important contribution to the discussion of 'servicification' trends in manufacturing. 'Services have increased in importance and value in many manufacturing value chains, making companies that produce physical products look more like service enterprises. What services do global value chains use in their operations, how important are they and how do economic policies shape firms' configurations, operations, and location of global value chains? This book addresses these questions and more. The interviewed firms, based in 12 APEC economies, come from different sectors ranging from multinational automotive, construction equipment, and

electrical appliance manufacturers to small and medium manufacturers of watches or chemical for water treatment. The book analyses what specific services are important in different stages of the value chain, and whether they are typically provided in-house or outsourced.
Contents: Manufacturing-Related Services (Patrick Low and Gloria O Pasadilla) Manufacturing of Aircraft Control Systems in the Philippines (Andre Wirjo and Gloria O Pasadilla) Industrial Welding Services in Thailand (William Haines) Manufacturing of Mining and Construction Equipment (David Sit and Patrick Low) Manufacturing of Computer Servers (Yuhua
