To extract maximum performance, an engine needs an efficient, well-designed, and properly tuned exhaust system. In fact, the exhaust system's design, components, and materials have a large impact on the overall performance of the engine. Engine builders and car owners need to carefully consider the exhaust layout, select the parts, and fabricate the exhaust system that delivers the best performance for car and particular application. Master engine builder and award-winning writer Mike Mavrigian explains exhaust system principles, function, and components in clear and concise language. He then details how to design, fabricate, and fit exhaust systems to classic street cars as well as for special and racing applications. Air/exhaust-gas flow dynamics and exhaust system design are explained. Cam duration and overlap are also analyzed to determine how an engine breathes in air/fuel, as the exhaust must efficiently manage this burned mixture. Pipe bending is a science as well as art and you're shown how to effectively crush and mandrel bend exhaust pipe to fit your header/manifold and chassis combination. Header tube diameter and length is taken into account, as well as the most efficient catalytic converters and resonators for achieving your performance goals. In addition, Mavrigian covers the special exhaust system requirements for supercharged and turbocharged systems. When building a high-performance engine, you need a high-performance exhaust system that's tuned and fitted to that engine so you can realize maximum performance. This comprehensive book is your guide to achieving ultimate exhaust system performance. It shows you how to fabricate a system for custom applications and to fit the correct prefabricated system to your car. No other book on the market is solely dedicated to fabricating and fitting an exhaust system in high-performance applications.

A Century of Cars Routledge

This compilation of poems is rolled out as one long poem which spans the journey of the spiritual growth of an adulterous woman in a nation spinning, while facing unspeakable adversity with grace and love. It also deals with individual spiritual growth and transferring love from a man to God, and also with National Politics in the USA and the threat of ISIS. It is not only poetry, but also draws influence from "Spoken Word" traditions. In the Afterword you will find a treasure of a Christian Testimony in the form of another Poem by Jamie Wyatt. "Dearest friends, for a long time I was in a place where my exterior circumstances controlled me internally, and I was miserable, not only because it wasn't I who had control, but also because those external circumstances were being imposed against my will, and like everyone else, I blamed it on our President (reminds me of Pink's song, "Mr. President," which was for a different Administration). Eventually, I started opening my mind to the possibility that if the good Lord had permitted so and so to happen, despite intercessory prayer, there was a reason for it and it was His Will. I still didn't like it; so, He opened up the heavens and showed me a little piece of His masterpiece here on earth- He let me see the grid and aliens and bad stuff too: I see ISIS for who they are. Then I realized, I'm just a little spec of sand on the map of time, in one universe, and if I could do some good to at least one other little spec of sand or two - that would probably be enough, and if there was some way the good Lord could use even my suffering and frustration, He would use it for at least my

own benefit and someone else's. God is great and nothing is wasted! So no matter what you're going through, know that God will somehow turn it to good in due time. Relish the fight! But love will get you peace. Blessings, hugs and warm thoughts to you and yours! God bless us and God bless the USA!" -Audrey Andujar Wright

During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With Holley Carburetors: How to Rebuild you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.
