"She's six feet tall and handles a motorbike like a professional. But Kate has insecurities that match her height and she ignores the past by pushing her fingers firmly into her ears. Who is her mother and why did she abandon her? What became of her grandmother who travelled up the Whanganui River on a paddle steamer to an ill-fated valley, beyond the Bridge to Nowhere? And who was the man she lived with in such an unorthodox way? And what should Kate do about her own two-pointed love triangle? Somewhere out there are the answers; out where only her

motorbike can take her. THE STRENGTH OF EGGSHELLS is an emotional journey that explores the lives of strong rural New Zealanders, set against the fragile isolation of a farm upbringing, two world wars and a landscape that is inevitably slipping beyond reach"--Amazon site.

Providing a comprehensive

overview of hot stamping (also known as ‘press hardening’), this book examines all essential aspects of this innovative metal forming method, and explores its various uses. It investigates hot stamping from both technological and business perspectives, and outlines potential future developments. Individual chapters explore topics such as the history of hot stamping, the state of the art, materials and processes employed, and how hot stamping is currently being used in the automotive industry to create ultra-high-strength steel components. Drawing on

experience and expertise gathered from academia and industry worldwide, the book offers an accessible resource for a broad readership including students, researchers, vehicle manufacturers and metal forming companies.

The Second Automobile

Revolution David and Charles
When leaders learn how to manage the emotions and drama in their organizations, conflict can be made healthier. Nate Regier uses the Drama Triangle Model and the Compassion Cycle to show leaders how to exercise compassion, not passion, and

turn the negative energy of conflict into a positive energy for increased productivity and growth. Conflict without Casualties fills a gap by showing leaders at any level how to leverage positive conflict. Practical, insightful, challenging, relevant. -Dan Pink, New York Times bestselling author Most organizations are terrified of conflict in the workplace, seeing it as a sign of trouble. But Nate Regier says conflict is really just a kind of energy and can be used in positive or negative ways. Handled incorrectly, conflict becomes

drama, which is costly to companies, teams, and relationships at all levels. Avoiding, managing, or reducing conflict is a limited alternative. Instead, Regier explores the interpersonal dynamics that perpetuate drama in organizations through a concept called the Drama Triangle and offers an alternative: the Compassion Cycle. The Compassion Cycle allows leaders to balance compassion and accountability, transforming conflict into a growth experience that enables organizations to achieve significant gains in energy,

productivity, engagement, and satisfaction in relationships. Provocative and illuminating, the concepts Regier shares will turn conflict from an experience to be avoided into a partner for positive change.

The Berkshire Encyclopedia of World History is the first true encyclopedic reference on world history. It is designed to meet the needs of students, teachers, and scholars who seek to explore -- and understand -- the panorama of our shared history of humans. Anyone who loves history -- including those who are making history today -- will find this

work an endless source of fascinating, thought-provoking coverage of events, people, patterns, and processes. To assure the highest quality, the encyclopedia was developed by an editorial team of over 30 leading scholars and educators, led by William H. McNeill, Jerry H. Bentley, David Christian, David Levinson, J. R. McNeill, Heidi Roupp, and Judith Zinsser. Its 550 articles were written by a team of 330 historians, archaeologists, anthropologists, sociologists, geographers and other experts from around the world. Students and teachers at the high school and college levels, as well as scholars and professionals, will turn to this defi

This book is an enthusiastic account of Pierre Laszlo's life and pioneering work on catalysis of organic reactions by modified clays, and his reflections on doing science from the 1960s to 1990s. In this autobiography, readers will discover a first-hand testimony of the chemical revolution in the second half of the 20th century, and the author's perspective on finding a calling in science and chemistry, as well as his own experience on doing

science, teaching science and managing a scientific career. During this period, Pierre Laszlo led an academic laboratory and worked also in three different countries: the US, Belgium and France, where he had the opportunity to meet remarkable colleagues. In this book, he recalls his encounters and collaborations with important scientists, who shaped the nature of chemistry at times of increased pace of change, and collates a portrait of the worldwide scientific community at that time. In

addition, the author tells us about the turns and twists of his own life, and how he ended up focusing his research on clay based chemistry, where clay minerals were turned in his lab to catalysis of key chemical transformations. Given its breath, the book offers a genuine information on the life and career of a chemist, and it will appeal not only to scientists and students, but also to historians of science and to the general reader.
