Increasing pressure on global reserves of petroleum at a time of growing demand for personal transport in developing countries, together with concerns over atmospheric pollution and carbon dioxide emissions, are leading to a requirement for more sustainable forms of road transport. Major improvements in the efficiency of all types of road vehicles are called for, along with the use of fuels derived from alternative sources, or entirely new fuels. Towards Sustainable Road Transport first describes the evolution of vehicle designs and propulsion technologies over the past two centuries, before looking forward to possible new forms of energy to substitute for petroleum. The book also discusses the political and socio-economic drivers for change, investigates barriers to their broad implementation, and outlines the state-of-the-art of candidate power sources, advanced vehicle design, and associated infrastructure. The comprehensive technical information supplied by an expert author team ensures that Towards Sustainable Road Transport will provide readers with a clear understanding of the ongoing progress in this field and the challenges still to be faced. - Drivers of technological change in road transport and the infrastructure requirements - Discussion of alternative fuels for internal combustion engines and fuel conversion technologies - Detailed exploration of current and emerging options for vehicle propulsion, with emphasis on hybrid/battery electric traction, hydrogen, and fuel cells - Comparative analysis of vehicle design requirements, primary power source efficiency, and energy storage systems

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells you how to make it happen!

Although scholarship in philosophy of action has grown in recent years, there has been little work explicitly dealing with the role of time in agency, a role with great significance for the study of action. As the articles in this collection demonstrate, virtually every fundamental issue in the philosophy of action involves considerations of time. The four sections of this volume address the metaphysics of action, diachronic practical rationality, the relation between deliberation and action, and the phenomenology of agency, providing an overview of the central developments in each area with an emphasis on the role of temporality. Including contributions by established, rising, and new voices in the field, Time and the Philosophy of Action brings analytic work in philosophy of action together with contributions from continental philosophy and cognitive science to elaborate the central thesis that agency not only develops in time but is shaped by it at every level.

No other individual has had as broad an impact on the auto industry during the past fifty years as Dave Power. Dave's persistence in getting auto executives to listen to customer concerns was key to the across-the-board rise in car quality, and the influence of his J.D. Power and Associates rankings has permanently raised the bar on customer satisfaction. Enhanced with anecdotal quotes from Dave as well as dozens of industry insiders, POWER is a compelling study of an intelligent, polite, market-research wonk who unblinkingly spoke truth to power, and ended up making customer satisfaction a watchword not just in automotive but in all manufacturing and service industries. Foreword by CNBC's Bill Griffeth

Mob boss Michael Franzese had it all—money, power, prestige. From the time he took a blood oath that bound him body and soul to New York's Colombo crime family, Franzese became a force to be reckoned with in organized crime. Named by Vanity Fair as one of the biggest moneymakers in the mob since Al Capone, he quickly crept into the upper echelon of Mafia authority in this country. By the age of thirty-five, he was the youngest mobster listed on Fortune magazine's survey of the fifty most wealthy and powerful Mafia bosses in America. Then, he did the unthinkable: he quit the mob. Today, Michael is a Christian, finding his own Damascus Road that began with his wife Camille. The story of his conversion is a testament of God's willingness to reach into the heart of any man regardless of their past or the present condition of their lives. In one of the most fascinating books ever written about today's Mafia, Michael reveals the answers to the many mysteries surrounding his incredible life. Find out how and why he did what no one else managed to do—and live. Journey with Michael through a life defined by two blood covenants. The first bound him to the mob. The second set him free.
