While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and

consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

**NEW YORK TIMES BESTSELLER** • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time  
How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores:

- Does sex actually sell?
- Does subliminal advertising still surround us?
- Can "cool" brands trigger our mating instincts?
- Can our other senses—smell, touch, and sound—be aroused when we see a product?

*Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

The economies of South Korea and Taiwan in the second half of the twentieth century are to scholars of economic development what the economy of Britain in the late eighteenth and early nineteenth centuries is to economic historians. This book, first published in 2006, is a collaboration between a leading trade economist and a leading economic sociologist specializing in East Asia, and offers an explanation of the development paths of post-World War II Korea and Taiwan. The ambitions of the authors go beyond this, however. They use these cases to reshape the way economists, sociologists, and political scientists will think about economic organization in the future. They offer nothing less than a theory of, and extended evidence for, how capitalist economies become organized. One of the principal empirical findings is that a primary cause for the industrialization of East Asia is the retail revolution in the United States and the demand-responsiveness of Asian manufacturers.

In this riveting tale we meet two couples caught in a web of conflicting passions, Diving instructor Sven Fiedler and his girlfriend, Antje, who live and work on the Spanish island of Lanzarote. When a tourist couple—Jola, a soap opera actress, and Theo, a stalled novelist—arrive for an intensive two-week diving experience, Sven is captivated by Jola's beauty and evident wealth. Theo suspects that Sven and Jola have begun an affair, but oddly, he seems to encourage them. Antje looks on, increasingly wary of these new clients. Cycling through different points of view, we are constantly kept guessing about who knows what—and who is telling the truth. A brutal game of temptation and manipulation unfolds, pointing toward a violent end—but a quiet one, underwater, beneath the waves.

Datsun's initial offerings were fairly conventional family cars, but with the introduction of the 240Z in 1969 the marque's image received a massive boost. It was a runaway success, outselling every European sports car model in the lucrative North American market. The 280Z arrived in 1975 followed by the 280ZX in 1978 and sales of the 280ZX had reached over 446,000 units by the time production came to an end in 1983. 44 international articles include road, track and comparison tests, a service guide plus full technical and performance data.

This "immensely stimulating story of true crime down the ages" tells the history of human violence, from Peking Man to the Mafia (The Times, London). This landmark work offers a completely new approach to the history and psychology of human violence. Its sweep is broad, its research meticulous and detailed. Colin Wilson explores the bloodthirsty sadism of the ancient Assyrians and the mass slaughter by the armies led by Genghis Khan, Tamerlane, Ivan the Terrible, and Vlad the Impaler. He delves into modern history, exploring the genocides practiced by Stalin and Hitler. He then takes a chilling look into the sex crimes and mass murders that have become symbols of the neuroses and intensity of modern life. With breathtaking audacity and stunning insight, Wilson puts criminality firmly in a wide, illuminating historical context. "A work of massive energy, compulsively readable, splendidly informative . . . it establishes Wilson in a European tradition of thought that includes H. G. Wells, Sartre and Shaw." —Time Out London "A tremendous resource for crime buffs as well as a challenging exposition for some of the more subtle criminological thinking of our time." —Kirkus Reviews

This book provides a political economy perspective on Chile's contemporary economic development, explaining the different stages of Chile's neoliberal pattern of economic integration into the global economy from 1973 to 2015. Three key explanatory variables are considered: the evolution of business-state relations, US geopolitical interest in the region through the waves of trade agreements, and the political impact of the dynamics of inflows and outflows of financial capital. Although Chile is typically considered to be a successful case of a free market economy, this book presents an alternative narrative of Chile's growth through using a Latin American Structuralist political economy perspective. While it recognises the positive results in terms of growth, it also emphasises the lack of dynamic sources for long-term development, which embeds the economy into short-term booms followed by periods of stagnation.

The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.
