In 2005, *The Woman at the Washington Zoo* was published to major critical acclaim. The late Marjorie Williams possessed "a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy," observed the New York Times Book Review. Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics

and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves "in his laborious baritone" a bank scandal's blow to his re-pu-taaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, "tah me to the mast!" Patricia Duff sheds "precipitous tears" over her divorce from Ronald Perelman, resembling afterwards "a garden refreshed by spring rain." Reputation illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

This study chronicles the success of the Japanese car in America. Starting with Japan 's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Although scholarship in philosophy of action has grown in recent years, there has been little work explicitly dealing with the role of time in agency, a role with great significance for the study of action. As the articles in this collection demonstrate, virtually every fundamental issue in the philosophy of action involves considerations of time. The four sections of this volume address the metaphysics of action, diachronic practical rationality, the relation between deliberation and action, and the phenomenology of agency, providing an overview of the central developments in each area with an emphasis on the role of temporality. Including contributions by established, rising, and new voices in the field, Time and the Philosophy of Action brings analytic work in philosophy of action together with contributions from continental philosophy and cognitive science to elaborate the central thesis that agency not only develops in time but is shaped by it at every level.

From one of America ' s most popular short story writers and an Academy Award nominee: the O. Henry Award – winning tale that inspired the movie The Hunt. A subject of mysterious rumors and superstition, the deserted Caribbean Island was shrouded in an air of peril. To Sanger Rainsford, who fell off a yacht and washed up on its shores, the abandoned isle was a welcome paradise. But unknown to the big-game hunter, a predator lurked in its lush jungles—one more

dangerous than any he had ever encountered: a human. First published in 1924, this suspenseful tale “ has inspired serial killers, films and stirred controversy in schools. A century on, the story continues to thrill ” (The Telegraph). “ [A] tense, relentless story of man-against-man adventure, in which the hunter Sanger Rainsford learns, at the hands of General Zaroff, what it means to be hunted. ” —Criterion Used Cars & Trucks Buyer's Guide 2005 Annual McFarland

New edition of the definitive international history of Mazda's extraordinarily successful Wankel-engined coupes & roadsters right up to the end of production and the introduction of the RX-8. This book gives advice on buying your own RX-7, and covers the RX-7 in motorsport, as well as listing production figures. Mazda launched its first rotary-engined car - the Cosmo - in 1966 and was the only car manufacturer to solve the major problems associated with Wankel's radical engine design so that the unit's potential could be exploited and enjoyed. Launched in 1978, the RX-7 provided effortless and uncannily smooth performance, attributes that endeared the model to enthusiasts through three generations of production. With each reincarnation the RX-7 became more of a Grand Tourer and less of a sportscar (a mantle handed on to the MX-5/Miata); global sales reduced as the car moved upmarket until, in the new millennium, the model was only sold in its native Japan. Heavily illustrated with good quality colour photographs, this book provides an in-depth insight into this amazing production automobile. "A must have for any RX7 enthusiast."

AAA helps you pick the best new car for your needs with this comprehensive 2004 vehicle buyer's guide. Evaluate more than 200 cars, SUVs, trucks and vans with this one convenient volume. Book jacket.
