Although scholarship in philosophy of action

has grown in recent years, there has been little work explicitly dealing with the role of time in agency, a role with great significance for the study of action. As the articles in this collection demonstrate, virtually every fundamental issue in the philosophy of action involves considerations of time. The four sections of this volume address the metaphysics of action, diachronic practical rationality, the relation between deliberation and action, and the phenomenology of agency, providing an overview of the central developments in each area with an emphasis on the role of temporality. Including contributions by established, rising, and new voices in the field, *Time and the Philosophy of Action* brings analytic work in philosophy of action together with contributions from continental philosophy and cognitive science to elaborate the central

thesis that agency not only develops in time but is shaped by it at every level.

From blowing up the bridge on the River Kwai to covering the Spanish countryside in fake snow for *Doctor Zhivago*, Eddie Fowlie led a remarkable career. From modest beginnings in a quiet London suburb, he broke into the movie industry during Hollywood's golden era to work with some of the world's leading directors, setting new standards as a film specialist and all-round troubleshooter.

But it was his unique relationship with David Lean that provided him some of the most cherished years of his career. The two were a perfect foil for each other, becoming close friends until the end of the director's life. Fowlie's candid life-story is also a hilarious roller coaster ride by one of life's mavericks - a true dedicated maniac.

In 2005, *The Woman at the Washington Zoo* was published to major critical acclaim. The late Marjorie Williams possessed "a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy," observed the New York Times Book Review. Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves "in his laborious baritone" a bank scandal's blow to his re-pu-taaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, "tah me to the mast!" Patricia Duff sheds "precipitous tears" over her divorce from Ronald Perelman, resembling afterwards "a

garden refreshed by spring rain." Reputation illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.
