Miata-Powered 1959 MGA Twin-Cam | Bring ...

This 1959 MGA roadster is claimed by the seller to be a genuine Twin-Cam example, which during a complete restoration had its factory engine and transmission swapped out for a modern fuel-injected unit out of a Mazda Miata. It looks as if the swap is totally stealth when the bonnet is closed, and the car retains all

Mazda FE-DOHC engine - Wikipedia

The Mazda FE-DOHC was the DOHC variant of the FE. The official Mazda engine codes are FE-DE and FE-ZE, depending on output level. It is still commonly called the FE3

because of its head castings. The FE-DOHC shares the same dimensions as the original FE-SOHC, including the square 86 mm bore x stroke and it has an ideal 1.74 rod/stroke ratio.

List of Mazda engines - Wikipedia

Like several other Japanese makers, Mazda produced V-twin engines for their three-wheeled delivery vehicles of the 1950s. These were also used in some of the tiny keicars of the 1960s. These were essentially motorcycle engines, and were largely

superseded by water-cooled straight-4 engines in a few years, except for in the Mazda R360 which remained in production until 1969 especially for the handicapped.

Magnecor Race Wires: Mazda twin cam technical bulletin

Mazda Miata twin cam engine in an MGA Twin Cam chassis. Very nicely done, but I don't understand placing the air intake next to the exhaust

manifold (unless it has a turbo charger). This one is Steve Bowen's 1959 MGA 1600 with a 1600 Miata Twin Cam engine and 5-speed. Find lots more details at

Steve Bowen's 1959 MGA with Mazda Miata Twin Cam Engine

A DOHC engine design is often called Twin Cam or Dual Cam. The majority of modern cars have a DOHC engine. A typical DOHC engine has two camshafts and four valves per cylinder, like the one in this animation. One camshaft operates intake valves, while another camshaft controls

exhaust valves on the opposite side.

AutoSpeed - The Mazda B6 and BP Engine Guide

“canted” at angles relative to the cam axis, as well as front to rear, to match the shallow hemispherical chamber. Manufactured at Dearborn (Mich.) Engine Plant, it was replaced by the Duratec® HE engine family. 1.6L/1.8L/2.0L DOHC MAZDA® ENGINES In the early 1990s, Mazda®-manufactured four-valve engines were shared with Ford applications.

[Timing The Mazda/Ford 2.0/2.3/2.5 Engines. Part 1 - Is](#)

[It Really That Hard?](#)

With a twin-cam engine that’s more powerful than the Lotus Elan it apes, the MX-5 offers sufficient performance, though not enough to trouble the fine handling and grip. Steering was sweet, and the gearchange was precise.

engine weights

The only non-MG engine in an MGA that ever brought a smile to my face was the installation of a Mazda Miata 1600cc twin cam engine into a MGA Twin Cam car. This sounds almost sacrilege, except that the car used started out as a badly rusted hulk with

no drive train which might otherwise have been relegated to the crusher.
