McCulloch Motors

Corporation is an American
manufacturer of chainsaws
and other outdoor power
tools. The company was
founded in Milwaukee,
Wisconsin, in 1943 by
Robert Paxton McCulloch as
a manufacturer of small two-
stroke gasoline engines and
introduced its first chainsaw
in 1948, the Model 5-49.
McCulloch and its brand are
owned by Husqvarna.

Troubleshooting a
McCulloch chain saw is

much like troubleshooting
any other chain saw -- they
all have common elements
which vary only in details. A
chain saw is a gasoline-
powered engine which drives
a sprocket which drives a
chain around a long bar. If
the engine has fuel, air and
spark, it should run.

McCulloch - How to start a two stroke trimmer engine
McCulloch gas chainsaws use a carburetor with needles that regulate the inflow of gas during different engine speeds. These needles can be opened and closed slightly through adjusting screws on the outside

of the carburetor. Adjusting the needles will help solve many engine problems and improve the overall performance of the engine.

The Power To Get The Job Done!

The McCulloch engine

doesn't come equipped with a starter but that wasn't a problem for me during my years of gyro flying because my husband Docko, was there to prop the engine for me. With his help always available, I never even thought about a starter. Docko passed away, and I retired from gyro flying and instructing.
