While Ford dabbled in supercharging and turbocharging on production cars all the way back in 1957 with the legendary Thunderbird, and then again with Shelbys and over-the-counter kits, and then again in the late '70s and early '80s with turbocharging 4- cylinder applications in Mustangs and SHOs, the real revolution in supercharging and turbocharging Ford products has come through the aftermarket in more recent times. #### Popular Science

The period between 1767 and 1873 shaped public finance in Britain (and, by extension, many other countries) as we know it today, with the major economists of the time providing influential contributions. Until now, no book has examined and compared the thought of these 'classical economists' from the perspective of public finance rather than that of pure theory. This groundbreaking volume critically analyzes and compares the writings on government expenditure, taxation and public debt of thinkers such as Adam Smith, Jeremy Bentham, David Ricardo and Thomas Malthus. These key figures are united by their struggles with fiscal theory - an important feature in the formation and development of political economy. An original and

intriguing read, this book breathes fresh life into the history of economic thought. Dome's clear and exciting arguments will make for essential reading for historians of economic thought, economic historians and those with an interest in public finance.

Founded in 1964 as a planned community, Lake Havasu City is nestled amid craggy desert peaks on the Colorado River in western Arizona. Perhaps best known as the American home of the famous London Bridge--moved to town, piece by piece, in 1971 and painstakingly reconstructed--Lake Havasu City was first home to natives of the Mohave and Chemehuevi tribes. Steamboats plying the waters of the Colorado, mining interests in the region, and the construction of Parker Dam, which resulted in the 45-mile-long Lake Havasu, all played important roles in the development of this unique community. Today, the

city's more than 50,000 residents and 2.5 million annual visitors enjoy myriad recreational opportunities in this desert oasis, as well as a historical legacy unlike any other.
