McCulloch MAC 110 Chain Maintenance . The chain saw chain requires periodic maintenance of the chain cutters. You can either file the McCulloch MAC 110 chain with a chain saw file or use an electric sharpener (12 volt or 110 AC chain grinder) to sharpen the cutter for top performance.

Make sure the McCulloch chain saw has fresh fuel, at least half a tank. Test the chain brake, in front of the saw's top handle, to be sure it is not engaged to lock the chain. Test the chain to see that it moves freely, is not binding in the bar and is properly adjusted for tension; a bar that is binding or is too loose or too tight will interfere with saw operation.
