As dazzling as the decade they dominated, The Beatles almost single-handedly created pop music as we know it. Today, their songs are cited as seminal influences by stars like Oasis, Blur and Kula Shaker. Eloquently giving voice to their time, The Beatles quite simply changed the world. Fully updated to include material from The Beatles Live at the BBC and the Anthology series, this acclaimed book goes back to the heart of The Beatles - their records. Drawing on a unique resource of knowledge and experience to 'read' their 241 tracks - chronologically from their first amateur efforts in 1957 to 'Real Love', their final 'reunion' recording in 1995 - Ian MacDonald has created an engrossing classic of popular criticism in which the extraordinary songs of The Beatles remain a central and continually surprising presence.

A fresh and timely approach to nurturing wise, resilient, and flexible leadership in a world of growing complexity Leaders tend to obstinately stick to the leadership style that brought them most success in the past, usually one of two extreme styles: functional leadership that focuses on operational excellence or smart leadership that focuses on growth. When a leader's focus is too functional, the organization becomes introverted and can focus too much on bottom-line profitability while missing out on top-line growth opportunities. But when leaders focus too much on smart leadership, the organization may experience quick growth but lose its effectiveness quickly. From Smart to Wise offers a new approach that balances the two styles to achieve a form of wise leadership that is both functional and smart. Drawing on inspiring real-life stories of historical and contemporary wise leaders such as Bill Gates, Warren Buffet, and even Mahatma Gandhi, the authors identify six characteristics of wise leaders and offer a practical framework to help readers develop their own style of wise leadership. A timely and innovative approach to leadership Written by noted speakers who conduct dozens of keynote speeches and workshops, training thousands of people annually

The obituary page of The New York Times is a celebration of extraordinary lives. This groundbreaking book includes 300 of the most important and fascinating obituaries the Times has ever published. The obituary page is the section many readers first turn to not only see who died, but to read some of the most inspiring, insightful, often funny, and elegantly written stories celebrating the lives of the men and women who have influenced our world. William McDonald, The Times' obituary editor who was recently featured in the award-winning documentary *Obit*, selected 320 of the most important and influential obits from the newspaper's archives. In chapters like "Stage and Screen," "Titans of Business," "The Notorious," "Scientists and Healers," "Athletes," and "American Leaders," the entries include a wide variety of newsmakers from the last century and a half, including Annie Oakley, Theodore Roosevelt, Joseph Stalin, Marilyn Monroe, Coco Chanel, Malcolm X, Jackie Robinson and Prince.

This book details the lives of two married geniuses, Aden and Marjorie Meinel, who helped to pioneer modern optics and solar energy in the U.S. Aden B. Meinel and Marjorie P. Meinel stood at the confluence of several overarching technological developments during their lifetimes, including postwar aerial surveillance by spy planes and satellites, solar energy, the evolution of telescope design, interdisciplinary optics, and photonics. Yet, their incredible stories and their long list of scientific contributions have never been adequately recognized in one place. In this book, James Breckinridge and Alec M. Pridgeon correct this oversight by sharing the story of this powerful duo. The book follows their lives and covers large scientific developments between World War II to the Cold War. James B. Breckinridge, a

previous advisee and later colleague to the Meinels, and historian and scientist Alec M. Pridgeon collected more than 200 hours of oral interviews with those who worked closely with the Meinels and some who built their careers around the findings made possible by their work. The book shares and analyzes the work done by the Meinels, and it also includes incredible insights from an unpublished Meinel autobiography.

Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

Simon Gray is the ideal teenager - smart, reliable, hardworking, trustworthy. Or is he? After Simon crashes his car into The Liberty Tree, another portrait starts to emerge. Soon an investigation has begun into computer hacking at Simon's high school, for it seems tests are being printed out before they are given. Could Simon be involved? Simon, meanwhile, is in a coma - but is this another appearance that may be deceiving? For inside his own head, Simon can walk around and talk to some people. He

even seems to be having a curious conversation with a man who was hung for murder 200 years ago, in the branches of the same tree Simon crashed into. What can a 200-year-old murder have to do with Simon's accident? And how do we know who is really innocent and who is really guilty?
