For statistics to be used by sociologists, and especially by students of sociology, they must first be easy to understand and use. Accordingly this book is aimed at that legion of professional sociologists and students who have always feared numbers; it employs much visual display, for example, as an easy way into the data. Also, the book is written in a relaxed and enthusiastic way that reassures apprehensive students without watering down what they

must be taught. Classical statistics were developed to meet the requirements of the natural sciences; as such they reflect the more deductive nature of hypothesis development in these sciences. However, they have offered the sociologists little in the way of techniques for exploring messy data in the context of incomplete theories. This book attempts to remedy those weaknesses, and it emphasizes exploratory data techniques which sociologists will find useful in their day-to-day research. The primary characteristics of exploratory techniques discussed by the authors are simplicity, resistance and elucidation. Its coverage is from basic statistics up to multiple regression and two-way anova. The inter-relationship between exploratory and confirmatory techniques is stressed, and, through the alternating presentation of each, the students learn to master data analysis: to be and to feel in control.

McGraw-Hill's GRE was one of the first guides to provide complete coverage of the new test features. The revised test is partially computer-adaptive (the old one had no computer-adaptive functions), and it has several all-new question types. Thousands of graduate programs require the GRE for admission. In addition, more than 500 business schools worldwide now also accept GRE scores for admission to MBA programs. The list includes many top-ranked schools such as Harvard, IE, INSEAD, MIT Sloan and Stanford. In 2010, the GRE General Test was taken by about 675,000 candidates. Test volume outside the United States increased 13% in 2010. The number of GRE takers outside the US in 2008 was approximately 172,000, with the largest numbers in China (52,000) and India (55,000). About the Author Steven W. Dulan (East Lansing, MI) is the founder and president of Advantage Education, Inc., which offers live test-prep classes at high schools and colleges throughout Michigan, Wisconsin, Ohio, and Colorado, as well as distance-learning programs over the Internet.
