Tad Brennan explains how to live the Stoic life - and why we might want to. Stoicism has been one of the main currents of thought in Western civilization for two thousand years: Brennan offers a fascinating guide through the ethical ideas of the original Stoic philosophers, and shows how valuable these ideas remain today, both intellectually and in practice. He writes in a lively informal style which will bring Stoicism to life for readers

who are new to ancient philosophy. The Stoic Life will also be of great interest to philosophers and classicists seeking a full understanding of the intellectual legacy of the Stoics. Brennan starts from scrupulous attention to the evidence (references are provided to all of the standard collections of Stoic texts). He provides translations of the original texts, with extensive annotations that will allow readers to pursue further reading. No knowledge of Greek is required. An introductory section provides context by introducing the reader to the

most important figures in the Stoic school, the philosophical climate in which they worked, and a brief summary of the leading tenets of the Stoic system. After this context is established, the book is divided into three sections. The first provides a thorough exploration of the Stoic school's theories of psychology, focusing on their analyses of fear, desire, and other emotions. The second develops the more centrally ethical topics of value, obligation, and right action. The third part explores the Stoic school's views on fate, determinism, and moral responsibility. For anyone

interested in the origins of Western ethical thought, who wishes to understand the vast influence that Stoic philosophy has had on philosophy and religion up to our time, this book will be essential reading. "Data Analytics is changing the

business world-data simply surrounds us! With so much data available about each of us (i.e., how we shop, what we read, what we buy, what music we listen to, where we travel, whom we trust, where we invest our time and money, etc.), arguably, there is the potential for analyzing those data in a way that can answer fundamental business and accounting questions and create value. According to the results of 18th Annual Global CEO Survey conducted by PwC, many CEOs put a high value on Data Analytics, and 80 percent of them place data mining and analysis as the second-most important strategic technology for CEOs. In fact, per PwC's 6th Annual Digital IQ survey of more than 1,400

leaders from digital businesses, the area of investment that tops CEOs' list of priorities is business analytics"-- Teaching and Curriculum Innovations McGraw-Hill/Irwin Managerial Accounting for Managers, 4th edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to

teach the financial accounting-oriented content that is included in the Garrison solution (no debits/credits). Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 4e is geared towards professors who love Garrison ' s market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for

Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting including McGraw-Hill's SmartBook, powered by LearnSmart, which is designed to help students learn

faster and more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises. Auto-Graded Excel Simulations, assignable within Connect Accounting, allow students to practice their Excel skills—such as basic formulas and formatting—within the context of accounting. These questions feature animated, narrated Help and Show Me tutorials (when enabled), as

well as automatic feedback and grading for both students and professors.
