Glencoe Accounting: First Year Course, Student Edition McGraw-Hill Education

"This should be essential reading for anyone involved in the training and professional development of early years practitioners... It is an impressive analysis of the historical and contemporary 'big ideas' that have influenced societies' and practitioners' views of children and the nature of the curriculum. There are powerful sections on parents and communities ... I particularly liked the stimulating 'ideas galleries' with their statements from researchers, policy-makers and practitioners around the world." Nursery World, October 2004 This key textbook introduces students and practitioners to a wide range of different approaches to early childhood. It provides practical strategies for developing and implementing early learning experiences that promote excellence and equity for children. The book presents the latest research and thinking about good practice, discusses how various philosophies and beliefs influence decisions in early childhood education, and identifies the key thinkers behind each approach. By examining different perspectives, the book helps early childhood practitioners to navigate their way through competing views, make informed choices, and be critically reflective in their work. In an accessible, lively and user-friendly way, it explores issues such as: What constitutes an appropriate early childhood curriculum How best to study and assess children Involving parents and children in early childhood learning The book features a range of pedagogical devices to inspire early childhood workers to reflect critically on their work and the ideas underpinning it, including: Boxed definitions of key terms Ideas summary charts and ideas galleries

Clarification exercises Case studies Further reading lists This essential textbook is ideal for students undertaking early childhood qualifications at degree level, Masters courses in early childhood education, and for practitioners who work with children from birth to eight in early childhood settings.

Assisted GPS, GNSS, and SBAS Artech House MRI from Picture to Proton presents the basics of MR practice and theory in a unique way: backwards! The subject is approached just as a new MR practitioner would encounter MRI: starting from the images, equipment and scanning protocols, rather than pages of physics theory. The reader is brought face-to-face with issues pertinent to practice immediately, filling in the theoretical background as their experience of scanning grows. Key ideas are introduced in an intuitive manner which is faithful to the underlying physics but avoids the need for difficult or distracting mathematics. Additional explanations for the more technically inquisitive are given in optional secondary text boxes. The new edition is fully updated to reflect the most recent advances, and includes a new chapter on parallel imaging. Informal in style and informed in content, written by recognized effective communicators of MR, this is an essential text for the student of MR.

Adolescence McGraw-Hill/Irwin

Since its development in the late 1970s, the Moire Fringe method has become a standard technique for the measurement of the behavior of

materials and structures. Edited by one of the co-inventors of the technique, the Handbook of Moire Measurement brings together a series of extended case studies from recognized experts in the field. The emphasis is Reaching Your Potential: Personal and Professional Development Penguin

Offering a detailed look at all the technical aspects and underpinnings of A-GPS, this unique book places emphasis on practical implementation. The book reviews standard GPS design, helping you understand why GPS requires assistance in the first place. You discover how A-GPS enables the computing of a position from navigation satellites in the absence of precise time - a topic not covered in any other book. Moreover, you learn how to design and analyze a high sensitivity GPS receiver and determine the achievable sensitivity. The book provides detailed worksheets that show how to compute, analyze, and improve the processing gain from the input signal at the antenna to the signal after the correlators. These worksheets are used in the book to generate families of curves that completely characterize receiver sensitivity, parameterized in terms of front end noise figure, coherent and noncoherent integration times. From this work a law of achievable sensitivity is derived and explained in the book.

The Art of Public Speaking Springer Science & Business Media While online learning continues to be a rapidly expanding field of research, analyzing data allows educational institutions to fine tune their curriculum and teaching methods. Properly utilizing the data, however, becomes difficult when taking into account how socio-technical systems are used, the administration of those systems, default settings, how data is described and captured, and other factors. Methods for Analyzing and Leveraging Online Learning Data is a pivotal reference source that provides vital research on the application of data in online education for improving a system's capabilities and optimizing it for teaching and learning. This publication explores data

handling, cleaning, analysis, management, and representation, as well as the methods of effectively and ethically applying data research. Tying together education and information science with special attention paid to informal learning, online assessment, and social media, this book is ideally designed for educational administrators, system developers, curriculum designers, data analysts, researchers, instructors, and graduate-level students seeking current research on capturing, analyzing, storing, and sharing data-analytic insights regarding online learning environments.

Look out for Daniel Pink ' s new book, When: The Scientific Secrets of Perfect Timing #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of Drive and A Whole New Mind, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we ' re employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we ' re all in sales now. To Sell Is Human offers a fresh look at the art and science of selling. As he did in Drive and A Whole New Mind, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

REACHING YOUR POTENTIAL takes a holistic approach to helping students take control of their lives and improve their self-belief. The text is organized around the four areas of emotional, intellectual, physical and social potential. Through a process of learning and self-examination, students discover their values, increase their commitment to personal goals, and challenge themselves to grow and learn. While gaining practical knowledge and skills, students will discover their emotional, intellectual, physical, and social resources. This model, which is thematically integrated throughout the text, allows readers to emerge from their learning experience understanding the importance of developing each of these areas in order to reach their fullest potential. The text involves readers in active learning with self-assessments, activities that apply concepts to their own lives, questions that test comprehension, and case studies to foster critical-thinking skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Handbook of Moire Measurement University of Toronto Press

The Oresteian trilogy (Agamemnon, Libation Bearers, Eumenides) established the themes of Greek tragedy - the inexorable nature of Fate, the relationship between justice,

revenge, and religion. The plays dramatize the murder of Agamemnon by his wife Clytemnestra, the revenge of her son Orestes, and his judgement by the court of Athens. This new translation seeks to preserve the plays' qualities as theatre and as literature.

David Spiceland, Wayne Thomas and Don Herrmann have developed a unique text based on over 50 collective years of experience in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course to non-majors with a Career Corner, and communicating it all in a student-friendly Conversational Writing Style. The new 2nd edition of Financial Accounting, Spiceland, Thomas, Herrmann, has been developed with feedback from over 330 reviewers and focus group participants from across the country. The following list of changes and improvements is a testament to the many hours that reviewers spent analyzing the 1st edition, helping make Financial Accounting, 2nd edition, the best book of its kind.

Medical Office Procedures CRC Press

Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has

been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

Shaping Early Childhood McGraw Hill Professional

The design of a highway drainage channel to carry a given discharge is accomplished in two parts. The first part of the design involves the computation of a channel section which will carry the design discharge on the available slope. This chapter briefly discusses the principles of flow in open channels and the use of the Manning equation for computing the channel capacity. The second part of the design is the determination of the degree of protection required to prevent erosion in the drainage channel. This can be done by computing the velocity in the channel at the design discharge, using the Manning equation, and comparing the calculated velocity with that permissible for the type of channel lining used. A change in the type of channel lining will require a change in channel size unless both linings have the same roughness coefficient.

Teach Yourself Electricity and Electronics, 5th Edition McGraw-Hill College

Essentials of Business Statistics: Communicating with Numbers is a core statistics textbook that sparks student interest and bridges the gap between how statistics is taught and how practitioners think about and apply statistical methods. Throughout the text, the emphasis is on communicating with numbers rather than on number crunching. By incorporating the perspective of professional users, the subject matter is more relevant and the presentation of material more straightforward for students. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
