Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a "Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

Study Guide, Volume 2 to accompany Intermediate Accounting

Forgotten Books

Excerpt from Accounting Problems Intermediate This book of exercises in accounting is the result of work by the authors extending over several years in collecting and preparing problems and exercises of an intermediate grade which would provide the instructor of accounting with a variety of laboratory material of a practical and teachable character. It should be understood that the book is essentially a compilation of problems and exercises illustrated by model statements of various types, rather than a presentation of accounting theory. It is, therefore, intended to be used in conjunction with a text on accounting theory or to supplement the instructor's own lectures on the subject. The work is adapted to second year students or to those even further advanced in their accounting course. It is divided into two parts. Part I

consists of more than forty model forms of financial statements and reports with comments and interpretations. These serve the purpose of familiarizing the student with forms of statements and reports adaptable to representative businesses and institutions, and at the same time they aim to present within certain limits the standardized practice in form and arrangement of such statements. The published balance sheets of representative industrial concerns of this country and Great Britain which are reproduced should broaden the horizon of the student, add to his knowledge of accounts and accounting terms, and serve to develop his power to interpret statements from the point of view of the business executive, banker, and investor. Part II consists of some four hundred problems and questions in accounting theory classified and arranged to correspond to the topics in accounting which would as a general practice receive consideration in the intermediate state of the student's work. Much more care and thought have been given to the selection of these problems than is apparent on the surface.
