 This volume encompasses the  
 range of issues encountered by  
 language scholars who teach and  
 research in departments of  
 languages and cultures within  
 the higher education system,  
 predominantly in Australia, but  
 touching other universities  
 worldwide. Related studies on  
 language planning,  
 methodology or pedagogy have  
 focused on one or more of these  
 same issues, but rarely on their  
 totality. Intersections as a  
 metaphor running discreetly

through the essays in this volume,  
 connects them all to a lived  
 reality. The field of languages and  
 cultures, as it is practised and  
 reflected upon in Australian  
 universities, is essentially an  
 interdisciplinary and  
 interconnecting space - one in  
 which linguistic and disciplinary  
 diversities meet and join forces,  
 rather than collide or disperse  
 along different pathways. The  
 international and local studies  
 featured here focus on language  
 planning, new pedagogies and  
 language reclamation and link to  
 meeting points and  
 commonalities. They show that  
 language scholars are  
 increasingly finding themselves  
 on common ground as they  
 tackle issues of policy and  
 practice affecting their field,  
 whether within their institutions,  
 within the tertiary system, or  
 within the framework of  
 government policy.

We all love stories. In Ambientes, students view, analyze, and converse about compelling stories and themes that organically emerge from the cortometrajes that serve as the foundation for every chapter. Highly contextualized grammar and language practice is presented in support of students' pursuit to discuss and think critically about the stories told and the people who tell them. By focusing on the stories' visual narrative and authentic cultural contexts as a means to language practice and acquisition, students become engaged and active participants in their language-learning process. With highly interesting topics, consistent recycling of structures, and manageable groupings of thematic vocabulary, Ambientes unlocks each learner's potential and sets students up for success and engagement in the Intermediate Spanish course. Ambientes is designed for 1-semester Intermediate Spanish courses and is delivered to students in a loose-leaf format.

Investigating Technology McGraw Hill

This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content (including media as a learning supplement), in comparison to traditional face-to-face learning. Each chapter includes research on, and a broad-brush summary of, approaches to combining life sciences education with educational technologies. The chapters are organized into four main sections, each of which focuses on a key question regarding the consequences of incorporating media into education. In this regard, the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity. Further, they address the ongoing discussion as to whether students need to be

present for lectures, and on how having agency in their own learning can improve both retention and conceptual understanding. To link the content to current events, the authors also shed light on the impact that the COVID-19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies.

Consequently, the book offers life science educators valuable guidance on the technologies already available, and an outlook on what is yet to come.

---

the same as those of the first edition, to provide an introductory language course that meets the needs of both instructors and learners. Three significant characteristics set *Avanti!* apart from other first-year Italian texts: First, *Avanti!* satisfies students' desire to communicate in everyday situations right from the start and to explore Italy's rich and unique culture in meaningful ways. Second, *Avanti!* responds to instructors' concern that most textbooks attempt to cover too much material in the first year. We have designed an elementary course that reflects reasonable expectations for the amount of material that most beginning learners can acquire in one year of classroom instruction. Third, the methodology of *Avanti!* is firmly grounded in current findings of research in second language acquisition and foreign language pedagogy. The materials provide support for instructors, particularly those with limited experience, whose goals are to teach mainly, if not exclusively, in Italian, and to create the student-centered, communicative classroom environment that is promoted by this research. The title *Avanti!* was chosen to convey the forward-thinking approach of this exciting new

program.

EBOOK: *Analysis for Financial Management* Irwin Professional Publishing  
Black & white print.

*Principles of Management* is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.
