and improve their writing skills as they record

their observations and results.

McGraw-Hill Science McGraw Hill Professional

The New York Times bestseller that gives readers a

paradigm-shattering new way to think about

motivation from the author of *When: The Scientific*

Secrets of Perfect Timing Most people believe that

the best way to motivate is with rewards like

money—the carrot-and-stick approach. That's a

mistake, says Daniel H. Pink (author of *To Sell Is*

Human: The Surprising Truth About Motivating

Others). In this provocative and persuasive new

book, he asserts that the secret to high performance

and satisfaction—at work, at school, and at home—is

the deeply human need to direct our own lives, to

learn and create new things, and to do better by

ourselves and our world. Drawing on four decades of

scientific research on human motivation, Pink

exposes the mismatch between what science knows

and what business does—and how that affects every

aspect of life. He examines the three elements of true

motivation—autonomy, mastery, and purpose—and

offers smart and surprising techniques for putting

these into action in a unique book that will change

how we think and transform how we live.

Inspire Science McGraw-Hill Education

Inspire Science is designed to help spark students'

curiosity and empower them to ask more questions,
