Letters I Never Mailed: Clues to a Life, by Alec Wilder, in a new, annotated edition with introduction and supplementary material by David Demsey, foreword by jazz pianist Marian McPartland, and photographs by Louis Ouzer. Letters I Never Mailed: Clues to a Life, by Alec Wilder, in a new, annotated edition with introduction and supplementary material by David Demsey, foreword by jazz pianist Marian McPartland, and photographs by Louis Ouzer. Alec Wilder is a rare example of a composer who established a reputation both as a prolific composer of concertos, sonatas, and operas, and as a popular songwriter [including the hit "I'll Be Around"]. He was fearfully articulate and had a wide and varied circle of friends ranging from Graham Greene to Frank Sinatra and Stan Getz. Letters I Never Mailed, hailed at its first publication [in 1975, by Little, Brown], tells the story of Wilder's musical and personal life through unsent "letters" addressed to various

friends. In it, he shares his insights -- and sometimes salty opinions -- on composing, musical life, and the tension between art and commercialism. This new, scholarly edition leaves Wilder's original text intact but decodes the mysteries of the original through an annotated index that identifies the letters' addressees, a biographical essay by David Demsey, and photographs by renowned photographer and lifelong friend of Wilder, Louis Ouzer. David Demsey is Professor of Music and coordinator of jazz studies at William Paterson University and an active jazz and classical saxophonist. He is co-author of Alec Wilder: A Bio-Bibliography [Greenwood Press] and has contributed to The Oxford Companion to Jazz.

United States Government Organization Manual Xlibris Corporation
This best-selling majors ecology book continues to present ecology as a series of problems for readers to critically analyze. No other text presents analytical, quantitative, and statistical ecological information in an equally accessible style. Reflecting the way ecologists actually practice, the book emphasizes the role of experiments in testing ecological ideas and discusses many contemporary and controversial problems related to distribution and abundance. Throughout the book, Krebs thoroughly explains the application of mathematical concepts in ecology while reinforcing these concepts with research references, examples, and interesting end-of-chapter review questions. Thoroughly updated with new examples and references, the book now features a new full-color design and is accompanied by an art CD-ROM for instructors. The field package also includes The Ecology Action Guide, a guide that encourages readers to be environmentally responsible citizens, and a subscription to The Ecology Place

(www.ecologyplace.com), a web site and CD-ROM that enables users to become virtual field ecologists by performing experiments such as estimating the number of mice on an imaginary island or restoring prairie land in Iowa. For college instructors and students.

Billboard
February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index

Moody's Bank and Finance Manual

Honest Weight is the 20th century story of Toledo Scale, beginning with their fight in the first decade for weights and measures laws to outlaw dishonest scales. In narrative form, it tells the living history of the company, beginning with the founder after he was dramatically fired by National Cash Register Company. Henry Theobald then started a scale and cash register company to compete with his old boss, the legendary John Patterson of NCR. It's the story of the inventors, leaders, craftsmen and technical breakthroughs, beginning in the first year of the 20th century up to current times. Included is the story of the innovative sales techniques developed by Theobald that led to tight-fisted merchants being willing to spend four and five times as much for a Toledo "No Springs-Honest Weight" scale than for the scale it replaced. This led to Toledo becoming the best known scale brand in the nation. It includes the story of how a plastic came to be developed for Toledo Scale under the leadership of the company's second president Hubert Bennett that led him to establish a separate, wholly owned company. This company, Plaskon, became the largest plastic company in the United States for a brief time. It tells of Toledo Scale's World War II contributions in which the company played a top-secret part in the production of the Norden bombsight and the atomic bomb. The story includes quotations from both retired company executives and current employees. It includes information obtained from an unpublished factual manuscript covering the company's first 50 years, other company archives and the Toledo Blade. A dozen historical photos are displayed, which include the first DeVilbiss computing scale, a Toledo Cash Register, and a Phinney scale which was the first patented computing scale. A few Phinney scales were manufactured in 1870. Since Toledo Scale couldn't locate one to prove they were actually manufactured, they lost a huge

lawsuit to Dayton Scale that almost broke the company. Also shown is a photo of Norman Bel Geddes' 1929-30 radical designs of a new factory and plant campus for Toledo Scale, never built due to the depression. The story includes the transition to electronic scales begun by the company's third president Harris McIntosh. This transition was completed in the final quarter of the century. And finally, the human story that resulted from the evolution of several different ownership's is told, until just a few years ago, Toledo Scale disappeared as a separate brand and was merged into Mettler-Toledo, Inc.
