For the Corvette enthusiast, there is no greater source of speculation, pent-up excitement, and anticipation than the pending introduction of a new-generation 'Vette. Since unveiling the original American sports car in 1953, GM has upped the ante with each successive model and along the way, the Corvette has evolved from 6-cylinder boulevard cruiser to street racer to Le Mans winner to world-class sports car. Sixty years of constant refinement have ensured that the next-generation Corvette will give its global competitors a strong run for their money. For the making of Corvette Stingray: The Seventh Generation of America's Sports Car, GM granted author Larry Edsall exclusive access to engineers, designers, and other Corvette team members, as well as its own photographic archives, to create the complete inside story of this

top-notch sports car. The seventh-generation Corvette (C7) again raises the bar, not only for outright performance but also for performance-for-dollar. Capable of running with - and in many cases outclassing - the likes of Ferrari, Porsche, Audi, and other European legends, Chevy's newest Corvette delivers the goods with a new look and even more performance technology. With more than 300 historical and behind-the-scenes photographs that take you as close to the car as you can get without sitting behind the wheel, Corvette Stingray is a must-own book for any serious gearhead--whether you're a long-time 'Vette junkie, a sports car devotee, or simply an admirer of beautiful machines.

Assigning Structures to Ions in Mass Spectrometry describes the tools currently available for determining gas-phase ion structures. It surveys current experimental methods for ion production and separation as well as those designed to reveal qualitative and quantitative aspects of gas-phase ions. It also examines how and when to apply computational chemistry and theoretical calculations. Selected case studies illustrate specific challenges associated with ion structure assignment and thermochemical problems. Bringing together key results collected over the past four decades, the book contains the data for describing or identifying ions containing C alone and C with H, O, N, S, P, halogens, and small organic cations.

The McLaren MP4/4 is the iconic Honda V6 turbo-powered F1 car built by McLaren for the 1988 grand prix season, driven by Ayrton Senna and Alain Prost. Remarkably, the car won all but one race during 1988, and took McLaren's then-new recruit Senna to his first Drivers' World Championship after a

season-long battle with team-mate Prost. McLaren achieved an astonishing 10 one-two finishes with the car, and suffered only two car-related retirements during the season. The MP4/4 is still statistically the most dominant F1 car ever built. Ironically, the fact that McLaren was already an enormously successful and well-resourced team prior to 1988 has led to the assumption that producing another winning car in the form of the MP4/4 was simply business as usual. The truth is rather different, with many challenges along the way, mistakes to resolve and, as ever in motor racing, an element of luck, all playing a part in the MP4/4's extraordinary success. A wealth of previously unpublished archive material, including original technical drawings and team documentation, provides fascinating new insight into the design and build of the MP4/4. Produced with the full cooperation of McLaren, and unique access to a race-winning MP4/4 chassis, this manual tells for the first time the accurate story of the design, engineering and operation of one of F1's most iconic cars, featuring extensive and often candid input from the designers, engineers and drivers involved. The McLaren story: Brief history of McLaren prior to the MP4/4 and subsequent history to the present day. Design and build of the MP4/4: The full story of how a completely new car, along with a one-off Honda engine, were designed and built for the 1988 season. The MP4/4 in action: A race-by-race account of the MP4/4's performance in the 1988 World Championship. The anatomy of the MP4/4: Chassis, aerodynamics, suspension, steering, brakes, Honda engine, transmission, wheels and tyres, cockpit and electrics. The drivers: Insight from Alain Prost and test-driver Emanuele Pirro, plus a profile of Ayrton Senna with thoughts from his former teammates. Appendices: Specifications, race results and statistics and full chassis histories.

You Can't Miss What You've Never Had That's the philosophy Claire Hannaford's always followed. Orphaned shortly after her birth, Claire's never had a family—and she's convinced herself she doesn't need one. Being on her own means she's free to take nursing posts wherever and whenever she wants. Her latest assignment brings her to the Parker Ranch to care for ailing Mae Parker, the clan's formidable matriarch. Claire's never seen a close-knit family like this one, and it reminds her that she's on the outside looking in. Tanner Reid, a member of the extended family, feels he's as much an outsider as Claire and reaches out to her. Before long, Claire realizes that Tanner and the rest of the Parkers have given her the home she's never had. And as

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
