The MD-11 is a medium- to long-range widebodyairliner, with two engines mounted on underwing pylons and a third engine at the base of the vertical stabilizer. It is based on the DC-10, but features a stretched fuselage, increased wingspan with winglets, refined airfoils on the wing and tailplane, new engines and increased use of composites.

Volvo Penta – Service Manual Download

The engines are fitted with a manual or electric starter. A decompression device On the rocker arm cover facilitates starting. The marine engines are sea—water Cooled and the industrial engines are fitted with a cellular type radiator. A thermostat maintains the operating temperature Of the engine automatic— ally within the correct values.
