Let's face it. Some people just don't listen, don't care, and aren't willing to compromise. And you probably work with some of them. The incomprehensible supervisor. The person in the next office who chats more than works. The customer who, by the way, isn't always right. For all those co-workers who drive you crazy, there's a solution. The bestselling author of Living Successfully with Screwed-Up People turns her insightful eye to the workplace, showing readers how they can get along with and work successfully beside the people who drive them up the wall. "It doesn't take two people to change a relationship in the workplace," says Elizabeth B. Brown. "It takes one--me!" Her expert advice will help workers in any profession learn how to be unflappable, imperturbable, and unflustered when dealing with the difficult people in their workplace.

Antimicrobial peptides (AMPs), including cathelicidins and defensins are host defence peptides that carry out multiple roles in the gastrointestinal (GI) tract. Antimicrobial Peptides in Gastrointestinal Diseases presents knowledge about the physiological functions and pharmacological actions of AMPs in inflammation, cancer, and further infection of the GI tract. The book provides coverage from the basic research to clinical application for GI diseases. Current research and development of AMPs is presented, opening the way for further work on these peptides, not only in the context of GI diseases, but also for similar pathologies in other organs. AMPs are key to the regulation of human microbiome and second line defence in the GI mucosa, prevent colonization of pathogens and modulation of innate response to invading pathogens, and modify immunological reactions during inflammatory processes and oncogenic development in the GI mucosa. More importantly, AMPs possess diversified anti-microbial actions against various infectious diseases in the GI tract. With these physiological functions and pharmacological actions, AMPs have significant potential as therapeutic agents for the treatment of inflammation, cancer and further infection in the GI tract. Provides an overview of AMPs, particularly cathelicidin and defensin, in different diseases Covers inflammation and ulcer repair in the stomach and colon and carcinogenesis in the GI tract Presents AMP information and knowledge in a concise manner Gives useful information on all aspects of AMPs Promotes research on AMPs and their development as drugs, from bench, to clinical application

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

'Scientists labelled fat the enemy . . . they were wrong.' Time magazine We've been told for years that eating fat is bad for us, that it is a primary cause of high blood pressure, heart disease and obesity. The Real Meal Revolution debunks this lie and shows us the way back to restored health through eating what human beings are meant to eat. This book will radically transform your life by showing you clearly, and easily, how to take control of not just your weight, but your overall health, too - through what you eat. And you can eat meat, seafood, eggs, cheese, butter, nuts . . . often the first things to be prohibited or severely restricted on most diets. This is Banting, or Low-Carb, High-Fat (LCHF) eating, for a new generation, solidly underpinned by years of scientific research and by now incontrovertible evidence. This extraordinary book, already a phenomenal bestseller, overturns the conventional dietary wisdom of recent decades that placed carbohydrates at the base of the supposedly healthy-eating pyramid and that has led directly to a worldwide epidemic of obesity and diabetes. Both a startling revelation, and as old as humanity itself, it offers a truly revolutionary approach to healthy eating that explodes the myth, among others, that cholesterol is bad for us. This is emphatically not just another unsustainable, quick-fix diet or a fad waiting to be forgotten, but a long-delayed return to the way human beings are supposed to eat. The Real Meal Revolution is an ebook which maintains the design of the book, and as a result will not display correctly on some basic reading devices.
