Unsaturated solution definition by Babylon's free dictionary

Unsaturated solutions are solutions in which the amount of dissolved solute is less than the saturation point of the solvent (at that specific temperature gradient). If the amount of dissolved solute is equal to the saturation point of the solvent, the solution is called a saturated solution. To form a mixture, two or more substances must be mixed.

Example 2: Unsaturated Solution; Example 2: Next, an unsaturated solution is considered. In Figure 2.1-2.3, there is a constant amount of water in all the beakers. Figure 2.1 shows the start of the process, in which solid solute is beginning to dissolve (represented by red arrows). In the next beaker, shown in Figure 2.2, a large amount of solute has dissolved.
