Using a consistent, logical, and step-by-step approach, *MEDICAL TERMINOLOGY: A LIVING LANGUAGE*, 5/e introduces students to the anatomy and physiology of body systems and the corresponding medical terms related to them. For each body system, broad coverage of anatomy, physiology, pathology, diagnostic procedures, treatment procedures, and pharmacology is provided. The author emphasizes both terms built from Latin and Greek word parts, and modern English terms, helping students develop a full working word part vocabulary they can use to interpret any new term. This edition contains many new terms, and has been reorganized for more efficient learning. To eliminate confusion, Word Building tables have been removed from each chapter and the terms have been distributed throughout the pathology, diagnostic procedure, and treatment procedure tables, where they are more immediately relevant to students.

Lead your students to success with the name you trust! Stedman's Medical Terminology: Steps to Success in Medical Language is a mid-level medical terminology text perfect for instructors looking for minimal coverage of anatomy and physiology and plenty of hands-on exercises to reinforce learning. Each chapter alternates between term presentation and exercises to ensure that students can apply what they have learned immediately. Throughout the text, exercises progress in a meaningful way, from recall and review, to word building, to comprehension, and finally to application and analysis through the use of "real-world" case study and medical record exercises. This approach allows the student to actively see their knowledge building and to connect what they are learning to real-life context. A robust, realistic, and relevant art program enhances the text, especially for visual learners. A full suite of ancillaries, including videos and animations, is available for both students and instructors.
