An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

This collection of solved problems corresponds to the standard topics covered in established undergraduate and graduate courses in *Quantum Mechanics*. Problems are also included on topics of interest which are often absent in the existing literature. Solutions are presented in considerable detail, to enable students to follow each step. The emphasis is on stressing the principles and methods used, allowing students to master new ways of thinking and problem-solving techniques. The problems themselves are longer than those usually encountered in textbooks and consist of a number of questions based around a central theme, highlighting properties and concepts of interest. LOS ANGELES TIMES BESTSELLER • WINNER OF THE NAUTILUS BOOK AWARD • "In a world full of spiritual seekers, Megan Griswold is an undisputed all-star. What a delightful journey!"—Elizabeth Gilbert, #1 New York Times bestselling author of *Big Magic* and *Eat, Pray, Love* The *Book of Help* traces one woman's life-long quest for love, connection, and peace of mind. A heartbreakingly vulnerable and tragically funny memoir-in-remedies, Megan Griswold's narrative spans four decades and six continents—from the glaciers of Patagonia and the psycho-tropics of Brazil, to academia, the Ivy League, and the study of Eastern medicine. Megan was born into a family who enthusiastically embraced the offerings of New Age California culture—at seven she asked Santa for her first mantra and by twelve she was taking weekend workshops on personal growth. But later, when her newly-wedded husband calls in the middle of the night to say he's landed in jail, Megan must accept that her many certificates, degrees and licenses had not been the finish line she'd once imagined them to be, but instead the preliminary training for what would prove to be the wildest, most growth-insisting journey of her life.
