The widely used membrane processes include microfiltration,
ultrafiltration, nanofiltration, reverse osmosis, electrolysis,
dialysis, electrodialysis, gas separation, vapor permeation,
pervaporation, membrane distillation, and membrane
contactors. All processes except for pervaporation involve no
phase change.

Membrane separation processes (Book, 2008) [WorldCat.org]

The field of membrane separation technology is presently in a
state of rapid growth and innovation. Many different membrane
separation processes have been developed during the past half
century and new processes are constantly emerging from

academic, industrial, and governmental laboratories.
