Considered one of the classics on Systematic Theology, the book covers all the basics on the reality of God, the atonement of Christ and the final state of man and the last things. Anyone who wishes to study theology would be wise to read this book as many in the Reformed tradition hold that it is a landmark in its field. It is arguably the most important twentieth century compendium of Reformed Theology. 'The work seemed particularly important to me', writes the author, 'in view of the widespread doctrinal indifference of the present day, of the resulting superficiality and confusion in the minds of many professing Christians, of the insidious errors that are zealously propagated even from the pulpits, and of the alarming increase of all kinds of sects.

In France, 1940, a young boy killed Hitler with a single shot. This is how this story begins. A Jewish, feminist women's fiction with a hint of magical realism, this story, which was partly inspired by the Russian play, The Dybbuk will sure to awaken the fire in your womb and the hidden passions you have been yearning for. If you loved 'Unorthodox' you will no doubt fall in love with this story. Alma, a young married Hasidic Jewish girl who lives in a French town called Roshel, does not seem to be aware of just how much freedom she needs. In a world where women feel as though they must find a man to complete themselves, haunted by the ghosts

of a past that is not even hers, she takes a terrifying, and harrowing path to self-discovery and finds her way to the wild woman that existed dormant in her, with the help of a mysterious, lustful man who calls himself "The Devil," She finds her way to Barcelona, where she meets a group of curious gypsy people who will help her find her way out of the invisible cage in which she lives, and surrender to the fire and passion that fills her womb. Alma falls in love and lust, but she realizes that she cannot belong to any man after she discovers the real truth of the past. That she already belongs to a ghost that will haunt to claim her forever. She was promised. And that promise cannot be broken. A story of a bond stronger than time, war and death, of a boy who destroys a world of dark men and the path a young woman must take to break the walls of a limiting, religious world. Where fire once burned her people, a new fire in her womb now leads her to create a new life.

With wit and sharp insight, former Traffic Commissioner of New York City, Sam Schwartz a.k.a. "Gridlock Sam," one of the most respected transportation engineers in the world and consummate insider in NYC political circles, uncovers how American cities became so beholden to cars and why the current shift away from that trend will forever alter America's urban landscapes, marking nothing short of a revolution in how we get from place to place. When Sam Schwartz was growing up in Bensonhurst, Brooklyn—his block belonged to his community: the kids who played punchball and stickball & their parents, who'd regularly walk to the local businesses at which they also worked. He didn't realize it then, but Bensonhurst was already more like a museum of a long-forgotten way-of-life than a picture of America's future. Public transit traveled over and under city streets—New York's first subway line opened in 1904—but the streets themselves had been conquered by the internal combustion engine. America's dependency on the automobile began with the 1908 introduction of Henry Ford's car-for-everyone, the Model T. The "battle for right-of-way" in the 1920s saw the demise of streetcars and transformed America's streets from a multiuse resource for socializing, commerce, and public mobility into exclusive arteries for private automobiles. The subsequent destruction of urban transit systems and post WWII suburbanization of America enabled by the Interstate Highway System and the GI Bill forever changed the way Americans commuted. But today, for the first time in history, and after a hundred years

of steady increase, automobile driving is in decline. Younger Americans increasingly prefer active transportation choices like walking or cycling and taking public transit, ride-shares or taxis. This isn't a consequence of higher gas prices, or even the economic downturn, but rather a collective decision to be a lot less dependent on cars—and if American cities want to keep their younger populations, they need to plan accordingly. In *Street Smart*, Sam Schwartz explains how. In this clear and erudite presentation of the principles of smart transportation and sustainable urban planning—from the simplest cobblestoned street to the brave new world of driverless cars and trains—Sam Schwartz combines rigorous historical scholarship with the personal and entertaining recollections of a man who has spent more than forty years working on planning intelligent transit networks in New York City. *Street Smart* is a book for everyone who wants to know more about the who, what, when, where, and why of human mobility.
