Have you lived before? Suddenly the idea of reincarnation has produced a wave of resonance in modern society and struck a chord. This book documents the growing public acceptance of the possibility that all of us will live again after we finish our present 'go-around' on the planet Earth. The ancient concept of reincarnation and past lives has not only re-emerged into our modern consciousness, but seems to have become a more natural and accepted part of our world view. Some studies show that twenty-five percent of people in modern western countries now agree that reincarnation is not only possible, but a reality. The implications of this are enormous. Imagine a population that has been released from the fear of death. Suddenly, we have all the time in the world - eternity, in fact! Life now takes on a new dimension of meaning. We realize that this is not all there is and we also understand that we are more than our physical bodies and because we are more than our physical bodies, we can access that which is beyond the physical. Our potential is virtually unlimited. Freedom from the fear of death is a kind of universal freedom that can flow across all aspects of life and living. Knowing that we are not mere physical lumps of biological matter, but indestructible souls constructed of pure consciousness is a magnificent vision for humanity. Knowing that we are 'souls' means that we can live out our lives from that basic understanding. It is the ultimate empowerment. No doubt many will remain sceptical about the possibility of reincarnation. But it seems this is a concept and a phenomenon that is not going away. Those amazing headlines in the media just keep coming. Every day more people - average, ordinary everyday people - are discovering that they have an undeniable connection to something larger, something infinite and something absolutely amazing. Dr. Tucker, in a follow-up to his book Life Before Life, explores American cases of young children who report memories of previous lives in the New York Times bestseller, Return to Life. A first-person account of Jim Tucker's experiences with a number of extraordinary children with memories of past lives, Return to Life focuses mostly on American cases, presenting each family's story and describing his investigation. His goal is to determine what happened—what the child has said, how the parents have reacted, whether the child's statements match the life of a particular deceased person, and whether the child could have learned such information through normal means. Tucker has found cases that provide persuasive evidence that some children do, in fact, possess memories of previous lives. Among others, readers will meet a boy who describes a previous life on a small island. When Tucker takes him to that island, he finds that some details eerily match the boy's statements and some do not. Another boy points to a photograph from the 1930s and says he used to be one of the men in it. Once the laborious efforts to identify that man are successful, many of the child's numerous memories are found to match the details of his life. Soon after his second birthday, a third boy begins expressing memories of being a World War II pilot who is eventually identified. Thought-provoking and captivating, Return to Life urges its readers to think about life and death and reincarnation, and reflect about their own consciousness and spirituality.

What happens after we die? \_x000D\_ \_x000D\_ Author and award winning filmmaker Richard Martini explores startling new evidence for life after death, via the "life between lives," where we reportedly return to find our loved ones, soul mates and spiritual teachers. Based on the evidence of thousands of people who claim that under deep hypnosis, they saw and experienced the same basic things about the Afterlife, the book documents interviews with hypnotherapists around the world trained in the method pioneered by Dr. Michael Newton, as well as examining actual between life sessions. The author agrees to go on the same journey himself, with startling and candid results, learning we are fully conscious between our various incarnations, and return to connect with loved ones and spiritual soul mates, and together choose how and when and with whom we'll reincarnate. Martini examines how "Karmic law" is trumped by "Free will," with souls choosing difficult lives in order to learn from their spiritually; no matter how difficult, strange or complex a life choice appears to be, it was made in advance, consciously, with the help of loved ones, soul mates and wise elders. Extensively researched, breathtaking in scope, "Flipside" takes the reader into new territory, boldly going where no author has gone before to tie up the various disciplines of past life regression, near death experiences, and between life exploration. Has your child lived before? In this fascinating, controversial, and groundbreaking book, Carol Bowman reveals overwhelming evidence of past life memories in children. Not only are such experiences real, they are far more common than most people realize. Bowman's extraordinary investigation was sparked when her young son, Chase, described his own past-life death on a Civil War battlefield--an account so accurate it was authenticated by an expert historian. Even more astonishing, Chase's chronic eczema and phobia of loud noises completely disappeared after he had the memory. Inspired by Chase's dramatic healing, Bowman compiled dozens of cases and wrote this comprehensive study to explain how very young children remember their past lives, spontaneously and naturally. In Children's Past Lives, she tells how to distinguish between a true past life memory and a fantasy, offers practical advice to parents on how to respond to a past life memory, and shows how to foster the spiritual and healing benefits of these experiences. Perhaps the most moving, convincing, and best-documented evidence yet for life after death, Children's Past Lives will stand alongside the classics of Betty J. Eadie, Raymond Moody, and Brian Weiss in its power to comfort, uplift, and transform our thinking about life after death
