MPPSC General Aptitude Test
Paper 2 Guide for 2021 Exam

Upkar Prakashan

This text is the best single

repository for a comprehensive examination of the scientific research and practical issues associated with adverse impact.

Adverse impact occurs when there is a significant difference in organizational outcomes to the disadvantage of one or more

groups defined on the basis of demographic characteristics such as race, ethnicity, gender, age, religion, etc. This book shows,

based on scientific research, how to design selection systems that minimize subgroup differences.

The primary object of this volume in the SIOP series is to bring together renowned experts

in this field to present their viewpoints and perspectives on what underlies adverse impact,

where we are in terms of assessing it and what we may have learned (or not learned) about minimizing it.

**Adding Value Through
People - A Changing Picture**

Prabhat Prakashan

This volume mainly focuses on theories, techniques and methods used by industrial and work psychologists.

Internationally renowned authors summarize advances in core topics.

MENTAL ABILITY Disha Publications

The history of testing mental abilities has seen the dominance of two contrasting approaches, psychometrics and neuropsychology. These two traditions have different theories and methodologies, but overlap considerably in the tests they use.

Historically, psychometrics has emphasized the primacy of a general factor, while neuropsychology has emphasized specific abilities that are dissociable. This issue about the nature of human mental abilities is important for many practical concerns.

Questions such as gender, ethnic, and age-related differences in mental abilities are relatively easy to address if they are due to a single dominant trait. Presumably such a trait can be measured with any collection of complex cognitive tests. If there are many specific mental abilities, these would be much harder to measure and associated social issues would be more difficult to resolve. The relative importance of general and specific abilities also has implications for educational practices. This book includes the diverse opinions of experts from several fields including psychometrics, neuropsychology, speech language and hearing, and applied psychology.
