These simple math secrets and tricks will forever change how you look at the world of numbers. Secrets of Mental Math will have you thinking like a math genius in no time.

Get ready to amaze your friends—and yourself—with incredible calculations you never thought you could master, as renowned “mathemagician” Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible,

dramatically improve your memory for numbers, and—maybe for the first time—make mathematics fun. Yes, even you can learn to do seemingly complex equations in your head; all you need to learn are a few tricks. You'll be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots

without blinking an eye. No matter what your age or current math ability, *Secrets of Mental Math* will allow you to perform fantastic feats of the mind effortlessly. This is the math they never taught you in school. *Everyday Mental Maths and Problem Solving A&C* Black More than just Mental Maths books - this series will equip students with all the mental maths strategies they need to excel in Maths throughout their lives. Mental Maths

is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'tricks' we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary

syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book: 32 double-page units of Mentals are included - 8 units for each school term. Each unit is divided into four sets (A, B, C and D) each set within each unit covers a different area of Maths : for example, set A always covers addition, subtraction, multiplication and division, while set D always covers measurement the fun illustrations and cartoons will help children engage with

the Maths concepts and enjoy completing the activities the answers to all questions are in a lift-out section in the centre of the book a special 'Help' section at the front of the book gives different strategies and explanations to help students solve Mentals problems. This link to the different kind of questions found in sets A, B, C and D *Teacher's book of mental arithmetic. [7 pt. in 1 vol.]* Pascal Press

No matter how simple it may

be, solving mathematical equations can be a challenge for quite a number of persons. Through his book titled "Secret Of Mental Math Arithmetic: 70 Secrets To Super Speed Calculation & Amazing Math Tricks", Jason Scotts seeks to provide the solution to those mathematical problems. The main challenge has come from the fact that most persons have become used to grabbing a calculator to solve a mathematical problem. As such, the mind has become a bit lazy and it takes a bit of prodding to get it working without having to use a

calculator. The text takes everything back to basics and reminds the reader of simple techniques that they were taught in school. This text is a must have in any home as it can help an individual to learn how to conquer those math equations without having the need to reach for a calculator. [Helpful books of mental arithmetic.
