Mercedes introduced their first unitary bodied car as the 180 in 1953. The following year the company revealed the 190SL with Plexiglas screen and lightweight doors. Not produced until March 1955 the production cars had bodywork akin to the 300SL and was powered by a 4-cylinder sohc engine of 1897cc. Production lasted until February 1963. Using racing techniques of padding lightness' the 300SL was built around a complex tubular chassis that made conventional doors impossible. Thus the Gullwing was born in 1952 as a pure sports/racing car. The production version gained weight with road going features and a slightly redesigned body. Bosch fuel injection helped to get the extra power needed. 1400 coupes were built before being replaced by the roadster in 1957. This is a book of contemporary road tests, technical data, racing, restoration.

The Rover P6 was unquestionably one of the best saloon cars to come out of Britain in the 1960s and was winner of the first-ever European Car of the Year award. It combined a wealth of technical innovation with a distinctive appearance that incorporated exactly the right degree of Italianate sharp-suited appearance for its time. It was, and remains, a great car to drive, and all these qualities were combined with the space and practicality of a four-seat family saloon. Rover P6: 2000, 2200, 3500 - The Complete Story documents its evolution from the earliest ideas in the 1950s to the end of production in 1977. It describes all the models with specification tables and paint and trim options, including NADA and Federal cars and remembers the motorsport successes and failures. It records the manufacturing process at Solihull and CKD overseas and includes a useful chapter on buying and owning a Rover P6.

COSWORTH - THE SEARCH FOR POWER (6th Edition) Brooklands Book Limited

Welcome to Cuba's automotive time capsule, filled with classic cars. The story of how Cuba came to be trapped in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country - its middle class ensured an interesting variety of vehicles plying the roads. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular culture, one marked by great creativity, such as: Keeping a car alive with no opportunity to acquire replacement parts; customizing a car with no access to aftermarket parts; drag racing with no drag strip. In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have been cut off from the world so long that they've morphed into something else in the spirit of automotive survival. Authors Tom Cotter and Bill Warner (founder of the Amelia Island Concours) take readers of Cuba's Car Culture on a whirlwind tour of all things automotive, beginning with Cuba's pre-Castro car and racing history and bringing us up to today's lost collector cars, street racing, and the challenges of keeping decades-old cars on the road. The book is illustrated throughout with rare historical photos as well as contemporary photos of Cuba's current car scene. For anyone who enjoys classic cars, from old Chevy Bel-Airs to Studebakers to Ford Fairlanes, a cruise around Cuba will make you feel like a kid in a candy store.

Decision of the Administrator of the Environmental Protection Agency Regarding Suspension of the 1975 Auto Emission Standards

“ In view of the number of volumes that have been produced in recent years about Germany ' s most famous auto maker, it must seem presumptuous to add yet another to the stack. Being relatively thin, this one had to be different. It devotes itself to Mercedes-Benz cars and the most specific and personal aspects of their development, performance and maintenance, at the unavoidable sacrifice of portions of the long history of this great firm. The fascinating story of Mercedes racing has been told by George Monkhouse, Laurence Pomeroy Jr. and S. C. H. Davis, among others, while the fine successes of 1954 and 1955 are still familiar to most readers. I ' ve chosen to concentrate on several Mercedes and Benz racing machines that were extremely interesting and productive yet remain virtually unknown today. At the other end of the performance scale the distinctive Mercedes diesels are covered completely... ” (1959 - Karl E. Ludvigsen)
