The Rover P6 was unquestionably one of the best saloon cars to come out of Britain in the 1960s and was winner of the first-ever European Car of the Year award. It combined a wealth of technical innovation with a distinctive appearance that incorporated exactly the right degree of Italianate sharp-suited appearance for its time. It was, and remains, a great car to drive, and all these qualities were combined with the space and practicality of a four-seat family saloon. Rover P6: 2000, 2200, 3500 - The Complete Story documents its evolution from the earliest ideas in the 1950s to the end of production in 1977. It describes all the models with specification tables and paint and trim options, including NADA and Federal cars and remembers the motorsport successes and failures. It records the manufacturing process at Solihull and CKD overseas and includes a useful chapter on buying and owning a Rover P6.

The Book contain Questions from Technical Subjects, such as, Strength of Materials, Engineering Mechanics, Production Engineering, Machine Design, Theory of Machines, Fluid Mechanics, Hydraulic Machinery, Thermodynamics, and RAC. The Book also comprises Question from General Awareness, Physics, Chemistry, Basics of Computers, and Basics of Environment & Pollution Control. This Book is drafted on new pattern of RRB-JE Exam having exceptional focus on quality and error-free Questions.
Mercedes-Benz W201 (190) Independently Published
“ In view of the number of volumes that have been produced in recent years about Germany ' s most famous auto maker, it must seem presumptuous to add yet another to the stack. Being relatively thin, this one had to be different. It devotes itself to Mercedes-Benz cars and the most specific and personal aspects of their development, performance and maintenance, at the unavoidable sacrifice of portions of the long history of this great firm. The fascinating story of Mercedes racing has been told by George Monkhouse, Laurence Pomeroy Jr. and S. C. H. Davis, among others, while the fine successes of 1954 and 1955 are still familiar to most readers. I ' ve chosen to concentrate on several Mercedes and Benz racing machines that were extremely interesting and productive yet remain virtually unknown today. At the other end of the performance scale the distinctive Mercedes diesels are covered completely... ” (1959 - Karl E. Ludvigsen)
Kiplinger's Personal Finance Keith Martin
Here's a quick way how you can improve your knowledge on the Mercedes 190SL, you just need to read this 180-page guide. It walks you through the car's interesting development and history, it explains chassis number and data card, discusses tests with a new, larger engine and comes with a comprehensive buyer's guide. All this is accompanied by superb recent non-Daimler AG color photos, this includes pictures of the suspension.
These are some of the topics covered: Development of the 190SL Technical aspects The 190SL A larger engine is needed Racing history The W121 BII in brochures and advertisement The European delivery program Driving a supercharged SL in 1959 190SL versus Porsche 356 Chassis number and data card

explained W121 buyer's guide Paint and interior options Technical specifications A separate chapter is devoted to Max Hoffman, US importer of Mercedes cars and Karl Wilfert, head of Mercedes passenger car design from the mid-1950s to the early 1970s. He was not only a highly talented, but occasionally also controversial manager. Very few remember him today. Enjoy!

Mercedes-Benz W201 (190)
The W201 was a compact saloon designed to address both concerns about fuel economy generated by the first oil crisis in the 1970s and competition for sales from the BMW 3 Series. Many doubted that Mercedes could deliver a compact car whilst retaining their traditional qualities. But the W201 soon won them over. For here was a car that was a real Mercedes in the tradition of the time - it was just smaller. With around 200 photographs, the book features the reasons behind the need to build a new compact saloon in the 1980s. It covers the styling, engineering and specification changes introduced over the lifetime of the model; gives full technical specifications, including paint and interior trim choices and production tables and vehicle number sequences. The story of Mercedes' long and exciting struggle to win the German Touring Car Championship with the 190 is covered. There is a chapter on the special US variants and, finally, a chapter on buying and owing a 201-series Mercedes.

There's more to discover in this epic series from DK Books! Take an action-packed flight through the history of air travel in Aircraft. Stay on the right track and step off at the most important and incredible rail routes from all over the world in Train.
MERCEDES-BENZ - Guide
Mercedes introduced their first unitary bodied car as the 180 in 1953. The following year the company revealed the 190SL with Plexiglas screen and lightweight doors. Not produced until March 1955 the production cars had bodywork akin to the 300SL and was powered by a 4-cylinder sohc engine of 1897cc. Production lasted until February 1963. Using racing techniques of 'padding lightness' the 300SL was built around a complex tubular chassis that made conventional doors impossible. Thus the Gullwing was born in 1952 as a pure sports/racing car. The production version gained weight with road going features and a slightly redesigned body. Bosch fuel injection helped to get the extra power needed. 1400 coupes were built before being replaced by the roadster in 1957. This is a book of contemporary road tests, technical data, racing, restoration.
