The Porsche 911 may be in production for over 40 years, but the modern water-cooled generation share little more than a philosophy with the first examples. Known worldwide by their Porsche internal type number, the 996 models represented a fresh start and offered a new standard in sports car performance and driving satisfaction. This new second edition packs in more specification data. We introduce all the 996 model types, describing the technical specifications, vehicle identification data, performance, colors and options. Using color photography of the cars and many actual problem areas, we introduce each model and what to look for when choosing and buying a used example.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not

be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
