When the mysterious Tatee walks into the renowned Manhattan Tango Studio all hell breaks loose, not a single person stays unaltered: old friendships are challenged and put to the test; seemingly confident women are alarmingly threatened by the novel newcomer's presence; cool sleek men lose their steps, stuttering incomprehensible disobedient words.

Unprepared for surreal and outlandish relationships she takes the role of an intrigued observer witnessing the unfolding drama where the dance floor reveals a theatre of the absurdity of human nature. The other stories explore the profoundness of human psyche where joy, suffering, humour and even madness can all be found. Encounter stories about cult escapees, an incompetent lawyer, a liberated husband, a case of mistaken identity and the serendipitous nature of synchronicity.

This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the

upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

Often overlooked by the staunchest Porsche enthusiasts, the 914 nevertheless continues to grow in popularity among club racers, entry-level collectors, and those who simply want a fun and relatively cheap sports car. This book covers 914 restorations and modifications, whether the goal is a restored stocker, modified street car, or a club racer. A history of the model traces the evolution of the Volkswagen-Porsche collaboration through the mid-1970s, while explaining what to look for when buying a 914 and what to do with it once purchased. Chapters are devoted to repair and restoration and modifications of body and trim, interiors, lighting and electrical, suspension, brakes, engines, fuel systems, transmission, wheels and tires, and detailing for concours participation.

This book offers extensive coverage of the most important aspects of UVR effects on all aquatic (not just freshwater and marine) ecosystems, encompassing UV physics, chemistry, biology and ecology.

Comprehensive and up-to-date, *UV Effects in Aquatic Organisms and Ecosystems* aims to bridge the gap between environmental studies of UVR effects and the broader, traditional

fields of ecology, oceanography and limnology. Adopting a synthetic approach, the different sections cover: the physical factors controlling UVR intensity in the atmosphere; the penetration and distribution of solar radiation in natural waters; the main photochemical process affecting natural and anthropogenic substances; and direct and indirect effects on organisms (from viruses, bacteria and algae to invertebrate and vertebrate consumers).

Researchers and professionals in environmental chemistry, photochemistry, photobiology and cell and molecular biology will value this book, as will those looking at ozone depletion and global change.

This book takes an integrated, evidence-based approach to the psychiatric aspects of organ transplantation. Unlike any other text currently on the market, this title presents the core principles of transplant psychiatry through an organ-

based structure that includes the heart, lungs, liver, GI organs, kidney, composite tissue, and other key areas of transplantation. Each section is divided into chapters discussing psychosocial, medical, and surgical considerations prior to and post-transplant, such as indications leading to a particular type of transplantation, medical course and complications after transplantation, psychiatric and psychosocial considerations before and after transplantation, history of each type of organ transplant, and any other special considerations. The text ends with special topics in care, including psychopharmacology, substance abuse, psychosocial evaluation of recipients

and donors, ethical considerations, cross-cultural aspects, and building the transplant psychiatry practice. It includes excellent learning tools, including over 140 tables and figures for ease of use. Written by interdisciplinary experts, *Psychosocial Care of End-Stage Disease and Transplant Patients* is a valuable resource for students and medical professionals interested in psychiatry, psychology, psychosomatic medicine, transplant surgery, internists, hospital administrators, pharmacists, nurses, and social workers.
