Although not the first V-8 engine ever produced, Henry Ford's side-valve V-8, launched in 1932, certainly qualified as the first mass-produced V-8 sold to the public. Because of Henry Ford's stubbornness, the first versions were less than ideal. The technology was in its infancy and cost-cutting measures limited the output and reliability of the early models. Over time, however, the "Flattie" became the go-to powerplant for a whole generation of new hobbyists who were called "hot rodders." The engine maintained its position in the hobby well into the 1950s, even when more modern overhead-valve designs started coming out of Detroit. It's hard to overstate the impact that this simple little engine had on a whole generation of enthusiasts. Even today, people choose a flathead for period-correct builds over far more powerful options. The style and sound of a modified flathead is an iconic part of American history. In *Ford Flathead Engines: How to Rebuild & Modify*, veteran author Tony Thacker and flathead guru of H&H Flatheads, Mike Herman, take you step-by-step through rebuilding a vintage flathead. One of the most important steps is to actually find a good, usable core; many have been sitting for a very long time and the engine design is prone to cracking. Running changes are also an important consideration when selecting a core, and include cooling system, ignition, and transmission mount. After you have selected a core, Thacker and Herman take you through the entire process of a rebuild, including teardown, parts inspection, machine shop processes, replacement part selection, re-assembly, start up, and break-in. Also covered is a unique performance build completed at the H&H shop for legendary race car team manager and all-around enthusiast Ray Evernham. It all adds up to more than 500

color photos and insider tips on building what could be called the most iconic engine ever built, the Ford flathead V-8.

Edmund Basseni is a small business owner, a body shop guy who pieces together the parts of car engines and their housings, motor and chassis. And he is also a hired assassin, a mechanic who does jobs as easily and flawlessly as he puts together a 383 hemi into a collectible Dodge. Vinnie, as he is called by friend and foe alike, has a problem. He has suffered a severe wound to his forearm, which leads to the hands and fingers that do the terrible job of “whacking” a wrong doer. After the accident he must piece his life together again and make it right; and in Vinnie’s world morality is a very important issue. There is justice and retribution and a code of honor that drives this good fellow to commit murder and mayhem. After an extensive period of rehab and strengthening, the shattered Vinnie is determined to pick up his weapon of choice, A Browning pistol, and return to the glory and privilege of his former world. He is also not exactly an outsider. As an an insider and operative in the shady world of finance and extortion, he owes people and is obliged to do their biddings. If he is ready; and Vinnie is in the process of getting ready. Bored with the tedium of reconstructing cars, he meets a very hot and sweet, but “married to the mob” young lady named Elizabeth. This slowly and inexorably develops into a “relationship” for them, but in the process of getting involved with Elizabeth, Vinnie meets and greets women in various places—forest, city and bar—and has some very steamy, and somewhat psychotic, sexual encounters. Vinnie and Alan conspire in a plot that is recreated about four times. Each job is a work of art, and that is Vinnie’s approach to his work. There is an interesting dynamic to their friendship, since they’re kind of bonded in the blood and iron of their work—organized criminal activity that is ruthless and business like, with violence and violent language a big part of their argot. Finally, the job is completed , and Vinnie, in the final scene in the novel, realizes a fractured dream of completion that is simply a continuation of the bizarre life he cannot seem to extricate himself from, no matter how hard he tries.
