Julia Roberts was one of the first two faces to appear on QVC The Shopping Channel in 1993, and her warmth and honesty have encouraged millions to shop from the comfort of their own homes ever since. She was not, however, a stranger to television, having previously appeared in *Beadle's About*, *The Price is Right* and numerous advertisements, including the Woolwich Building Society where she famously asked, 'Can I help you?' None of this would have come about if she hadn't survived the killer disease polio in the 1950s. Not only did she survive but, against all the odds and the advice of her careers teacher at school, she became a professional dancer. That was the start of a long and varied career in the entertainment industry, unless you count appearing on the front cover of a cookery book at the age of ten. She has worked as a DJ, a singer, and actress and, for the last 24 years, a presenter; and it's all in her book *One Hundred Lengths of the Pool*. Each of the hundred lengths is associated with special moments from her life - some professional, some personal, some happy and some sad. However, there is an extra length of the pool that she didn't expect to swim and it has changed her life completely, testing her belief in her favourite saying, 'That which does not kill us, makes us stronger...'

Prompted by the success of the MX-5 the SLK was based on a shortened C-class

platform designed to include the Vario retractable steel roof and shown as a concept car in 1994. Full production began two years later but the UK only got the flagship model with a 193bhp, 2.3-litre supercharged engine with automatic gearbox. It was not until 2000 that the 3.2 litre V6 engine mated to a six-speed manual gearbox, became available. With this came body styling changes. The CLK was also based on the C-class platform but came with four seats and looked very similar to the E-class. It quickly went from the 2.3 to the 3.2 engine. Then came a cabriolet version. Mercedes kept up the pressure by introducing the CLK430 coupT with a 4.3-litre V8. This is a book of contemporary road and comparison tests, technical data, travel, long-term impressions, new model introductions. Models covered include: - SLK 200, CLK 230, CLK 320, SLK 230, CLK 430, SLK 320, CLK 55 AMG.

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced.

Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian,

editor of *Engine Building Professional*, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.
